Nuhavi Health

Clarity before you travel. Care until you're home.

Website look and feel

Final visual reference for the developer

Date	30 October 2026
Source	repository `nuhavi-health-web`, tested build (158 pages, all checks passing)
Status	Not deployed. Content marked amber still needs confirmation

Screenshots taken in Chromium at 1366 px (desktop) and 390 px (mobile) from the actual build — this is the site, not a mock-up.

How to read this document

Build exactly what you see. The code in the repository already produces these screens; this document is the visual standard to keep when you change anything.

[Needs confirmation: …]	A fact the founders, a clinician or counsel must confirm. It must be replaced by the real value — never deleted or guessed. `lint:content -strict` fails while any remain.
Photo to come	A slot for real photography or video. Shot list and rules: `docs/PHOTO-BRIEF.md`. Never fill with stock images.
Demonstration mode	Appears only in preview builds without the live APIs. Production never shows it.

What changed in this version

- Floating "Chat with us" button on every page. It shows **Telegram first** on Russian/Uzbek pages and the Uzbekistan page, and **WhatsApp first** elsewhere. No chatbot.
- **Upload after consent:** after sending an enquiry, the patient can tick a separate consent and receive an emailed 48-hour link to a secure upload page. Countries switch on one by one; Uzbekistan waits for counsel.
- Eight **photo/video slots** with labelled placeholders, plus a photographer's brief.

Contents

1. Design system
2. Page inventory
3. Desktop pages (16)
4. Interaction states
5. Mobile
6. Arabic (right-to-left) preview
7. "Looks right" acceptance checklist

1 · Design system

Navy carries structure and action, gold is a sparing accent, white space does the reassuring.
Tokens live in `apps/web/src/styles/global.css`.

#FFF6E5

Needs confirmation

Amber markers: unconfirmed facts. Must reach zero before launch

Type — Manrope only (Noto Sans Arabic for Arabic)

Heading 1 · 800

Heading 2 · 800

Heading 3 · 700

Deck · 300 — the light partner to the heavy headline, echoing the wordmark

Body · 400 · line height 1.6 · lines no longer than about 66 characters

Components and rules

Request a medical opinion

Request a medical opinion

Explore treatments

- Buttons are pills (radius 999 px), at least 48 px tall, and say exactly what happens. No arrows appended.
- Cards and panels: 14 px radius, matching the logo's rounded square. 1 px borders, no drop shadows (except floating panels).
- 8 px spacing grid; sections 96 px tall on desktop, 56 px on mobile.
- Gold 72 × 3 px rule above every page title; gold route line is the one signature motion.
- Motion only where it explains: route draw, disclosure, progress. Respect reduced motion. No carousels, autoplay, pop-ups or countdowns.
- Focus ring 3 px gold on every interactive element. All text meets WCAG 2.2 AA contrast.
- Responsibility colours: gold = Nuhavi coordinates; navy = hospital decides; green = what you receive.
- Never: doctor photos as promotion, rankings, stock photography, invented numbers, "guaranteed", "best", "world-class".

2 · Page inventory

158 pages are built: English (live) plus Russian and Arabic previews (not indexed). Every URL starts with the language code.

Template shown here	Example URL
Home	/en/

Header navigation: Treatments · Hospitals · How it works · Countries · Stories · Resources · About · Contact, with the language selector and "Request a medical opinion". Below 1,200 px the navigation collapses into the Menu button.

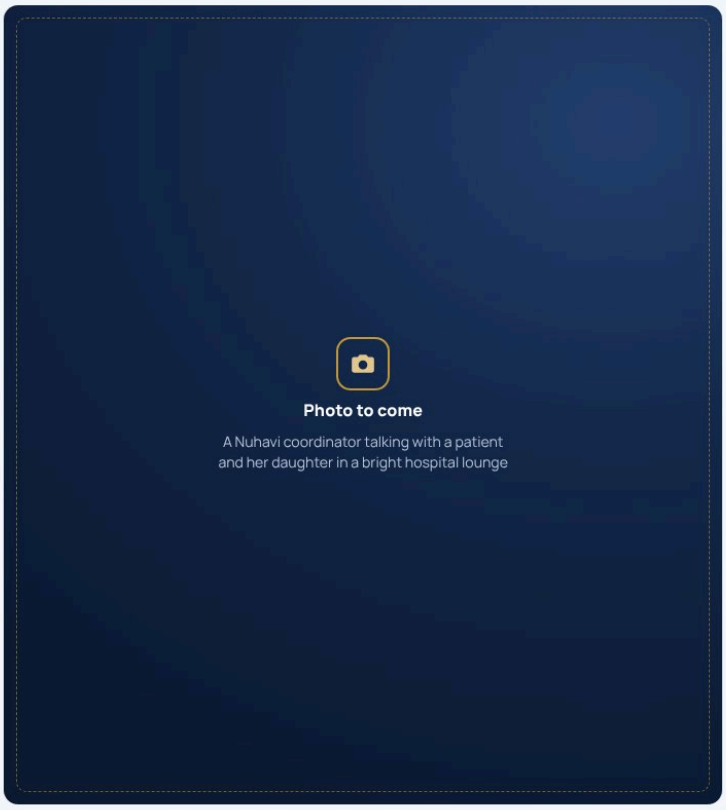

Home /en/

- Hero: deep navy, headline and light deck from the brief. The gold route line draws once on load (about 2 s); with reduced motion it appears already drawn. Its three stops are buttons that change the text panel.
- "People, not packages": a three-photo collage. Real photography only (see PHOTO-BRIEF.md). The navy "Photo to come" boxes are placeholders, not a style.
- Specialty explorer: oncology and orthopaedics are the two large navy tiles ("Accepting enquiries"); the other eight are white "On request" tiles. The filter buttons work.
- Seven-step journey: gold edge = Nuhavi does this; navy edge = the hospital decides. Keep this colour logic everywhere.
- Cost bar shows the parts of a bill with no prices. Empty states for hospitals and stories are deliberate and honest.
- Closing navy band ("Your treatment journey starts with clarity.") and footer appear on every page; they are shown only here to save space.

People, not packages

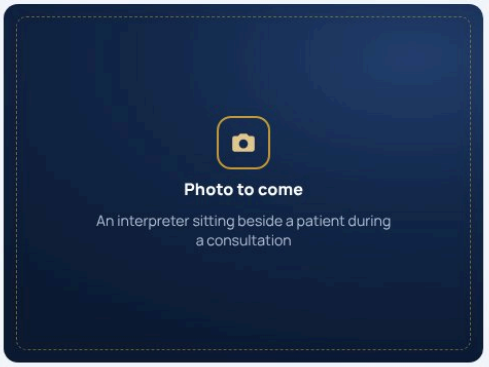

The same coordinator meets you, sits with you at consultations and checks on you after you fly home.

Your coordinator explains each step, in writing and in person.

Met at Hyderabad airport and taken to your stay.

An interpreter at consultations when you need one.

Explore treatments

We focus first on cancer care and joint replacement, where we can coordinate properly. Other specialties are arranged case by case.

All (10) | Accepting enquiries (2) | On request (8)

Accepting enquiries

Cancer care (oncology)

Diagnosis review, surgery, chemotherapy, radiotherapy and newer therapies.

Accepting enquiries

Orthopaedics and joint replacement

Knee and hip replacement, revision surgery, selected spine and sports surgery.

On request

Neurology and neurosurgery

Brain and spine tumours, epilepsy, movement disorders, neurorehabilitation.

On request

IVF and fertility

Fertility evaluation, IVF and ICSI, fertility preservation.

On request

General and laparoscopic surgery

Hernia, gallbladder, gastrointestinal and colorectal surgery.

On request

Heart care

Cardiology and cardiac surgery.

On request

Gastroenterology

Digestive and liver conditions.

On request

Urology and kidney care

Urology, nephrology and kidney stones.

On request

Women's health

Gynaecology and related care.

On request

Children's care

Planned care for children, with a parent or guardian.

"On request" means we will look for a suitable, verified hospital for your case. It does not mean the service is already arranged.

How Nuhavi works

Seven steps from first message to follow-up. Open any step to see who does what.

- Nuhavi coordinates
- The hospital makes clinical decisions

See the full process

1 Send an enquiry

Tell us briefly what you need, in your language. Do not paste medical reports into the form.

You	Nuhavi (coordination)
Name, country, contact details and a short description.	Gives you an enquiry number and assigns a coordinator who speaks your language.
Treating hospital (clinical)	**What you receive**
Not involved yet.	An acknowledgement with your enquiry number.

2 Share your records securely

Straight after your enquiry, agree to secure storage and we email you a private upload link — or do it later, when your coordinator asks.

3 Clinical review

With your consent, we send your records to a suitable hospital team for review.

4 Understand your options

The hospital's opinion explains what they recommend and why.

5 Review estimates

You see written estimates with what is included, what is not and how long they are valid.

6 Plan appointments and travel

Once you decide, we plan the visit around your hospital appointments.

7 Follow-up after you return home

Care continues after discharge, so we stay in touch.

Why patients and families choose a coordinator

One point of contact
A coordinator who knows your case, from first message to follow-up.

Clear communication
Plain language, in your language where we can, and written down.

Help understanding options
We make sure you understand what each hospital is proposing and why.

Written estimates
Inclusions, exclusions, currency and validity date — side by side.

Appointments coordinated
Reviews, admission and follow-up visits planned around you.

Travel and stay, if you want it
Invitation letter, airport pickup, accommodation near the hospital.

Language support
Interpreters at consultations where needed.

Support for your family
Help for the person travelling with you, too.

Discharge and follow-up
We make sure you leave with your summary and a plan, and we stay in touch.

Respect for your privacy
Records shared only with hospitals you agree to, through private links.

Hospitals are chosen on capability, not popularity

We present hospitals by their services, infrastructure and accreditation — never by individual doctors.

- Current national accreditation (NABH) or international accreditation (JCI) for the hospital, with the certificate and expiry date on file
- The specialty infrastructure your treatment needs — for example radiotherapy, intensive care or a joint-replacement theatre
- A multidisciplinary team review (tumour board) for cancer cases
- An international patient desk and access to interpreters
- Written estimates with inclusions, exclusions and validity

Read our selection standard

Hospital profiles appear here after a signed agreement and an independent check of their accreditation and services.

None are listed yet. Until then, we tell you the hospital's name and credentials directly when we share options for your case.

What goes into the cost of treatment

Select each part to see what it covers and why it varies. We do not publish prices until hospitals confirm them in writing.

How estimates and our fee work

Illustrative shares only — your estimate depends on your treatment and hospital.

Hospital charges · Professional fees · Investigations · Medicines and implants · Rehabilitation and follow-up · Travel and stay · Nuhavi coordination fee

Hospital charges

Room, nursing, operating theatre, intensive care if needed. Varies with the length of stay and room category.

Patient stories

Real stories, told with the patient's written permission, will appear here.

We will not publish invented testimonials, outcome claims or photos without consent.

Each story will say what was coordinated and what was not, and the patient can withdraw it at any time.

How we handle patient stories

Prepare with confidence

Guides and checklists you can use before you contact any hospital.

Preparing your medical records
What to collect, how to scan it, and what not to send.

Questions to ask before choosing a hospital
Questions that help you compare hospitals on what matters.

Understanding a treatment estimate
The difference between a preliminary estimate and a confirmed quotation.

Medical second opinions
When a second opinion helps, and what it can and cannot tell you.

Travelling with a companion
Planning for the person who comes with you.

After you return home
Keeping care going once you are back.

Your treatment journey starts with clarity.

Tell us what you need. A coordinator will explain the next step and what we will ask you for — nothing more until you are ready.

Nuhavi Health coordinates care. We are not a hospital and do not diagnose or treat. Medical decisions are made by your treating doctors. In an emergency, contact local emergency services now.

© 2026 Nuhavi Health Pvt. Ltd.

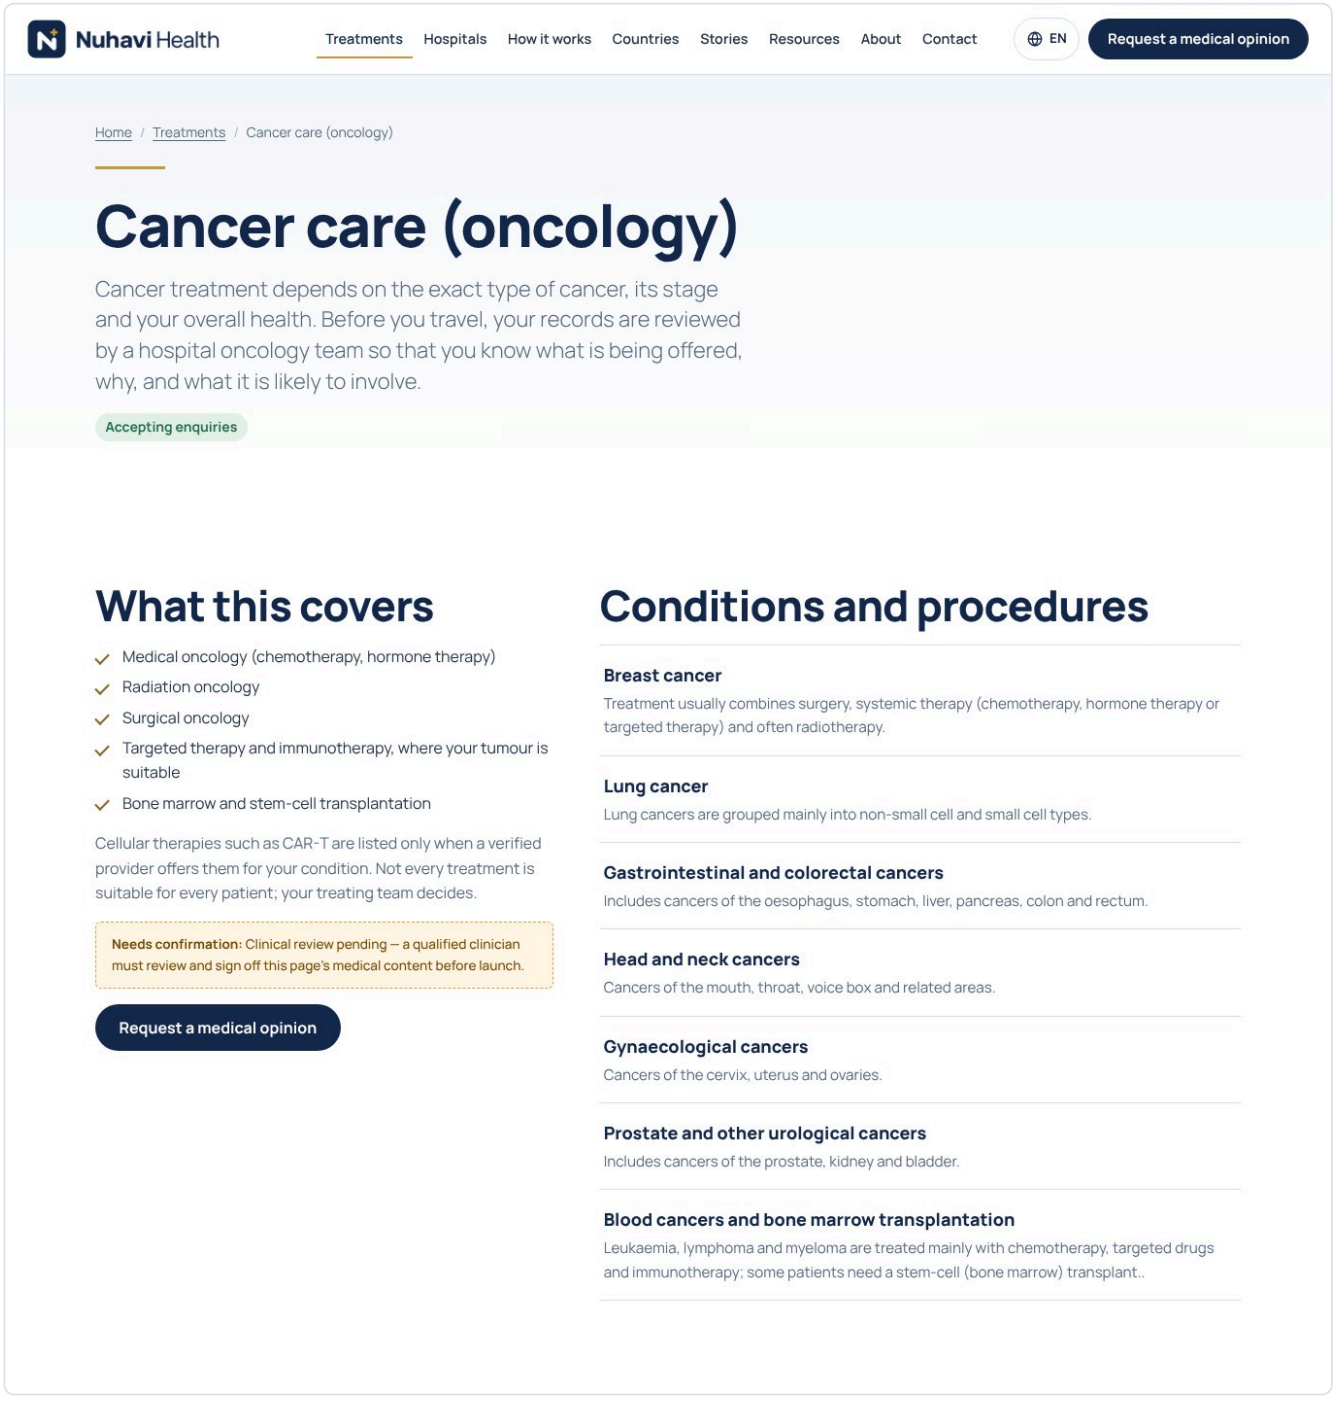

Treatments /en/treatments/

- Same explorer as the home page, with all ten specialties. "On request" never implies a service is arranged.

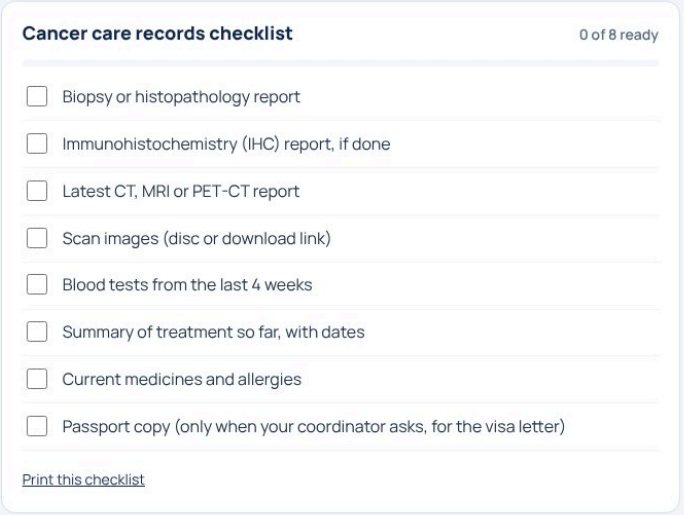

Specialty page (oncology) /en/treatments/oncology/

- Status badge under the title. Conditions listed as rows with a one-line summary.
- Records checklist with a progress bar: ticks stay in the page only, nothing is saved. The amber "Clinical review pending" box disappears only after a clinician signs off.

Records to prepare

Complete records mean a faster, more useful review. Tick items off as you collect them.

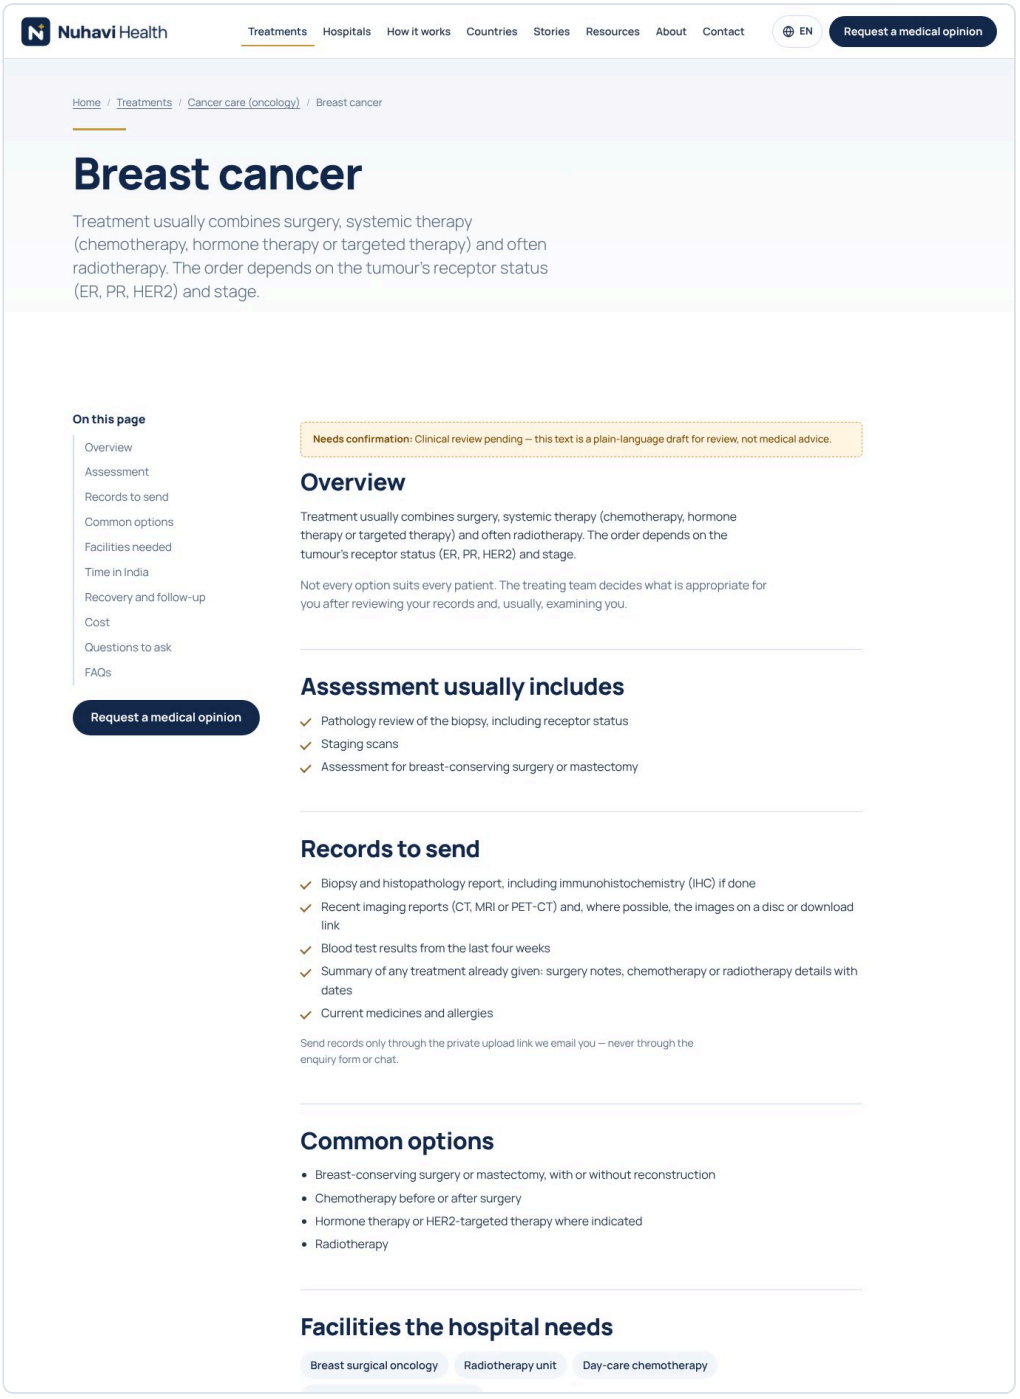

The usual journey

The same seven steps for every case. Clinical decisions always stay with the treating hospital.

1. **Send an enquiry**
2. **Share your records securely**
3. **Clinical review**
4. **Understand your options**
5. **Review estimates**
6. **Plan appointments and travel**
7. **Follow-up after you return home**

Condition template (breast cancer) /en/treatments/oncology/breast-cancer/

- Sticky "On this page" contents on desktop; hidden on mobile.
- Ten fixed sections in this order for every condition. FAQs carry structured data for search.
- No prices until a hospital confirms them in writing; no doctor names.

Pathology with receptor testing

Time in India

Surgery usually means a short inpatient stay. Courses of chemotherapy or radiotherapy can last weeks to months; your team will say whether part can be given at home.

Recovery and follow-up

Recovery depends on the surgery and therapies chosen. Your team will explain wound care, arm exercises and side-effect management.

Before you fly home, make sure you have your discharge summary, a medicines list and a follow-up plan your local doctor can use.

Cost

We show indicative ranges only when a hospital has confirmed them in writing, with the date, currency, inclusions and exclusions. Until then, your estimate comes from the hospital after reviewing your records.

What makes up a treatment estimate

Questions to ask your treating team

1. What is the stage of my cancer, and how was it worked out?
2. Will a team of specialists (a tumour board) review my case?
3. What are the aims of each option: cure, control or comfort?
4. Which tests need repeating in India, and why?
5. How long will I need to stay, and what follow-up can happen at home?

Frequently asked questions

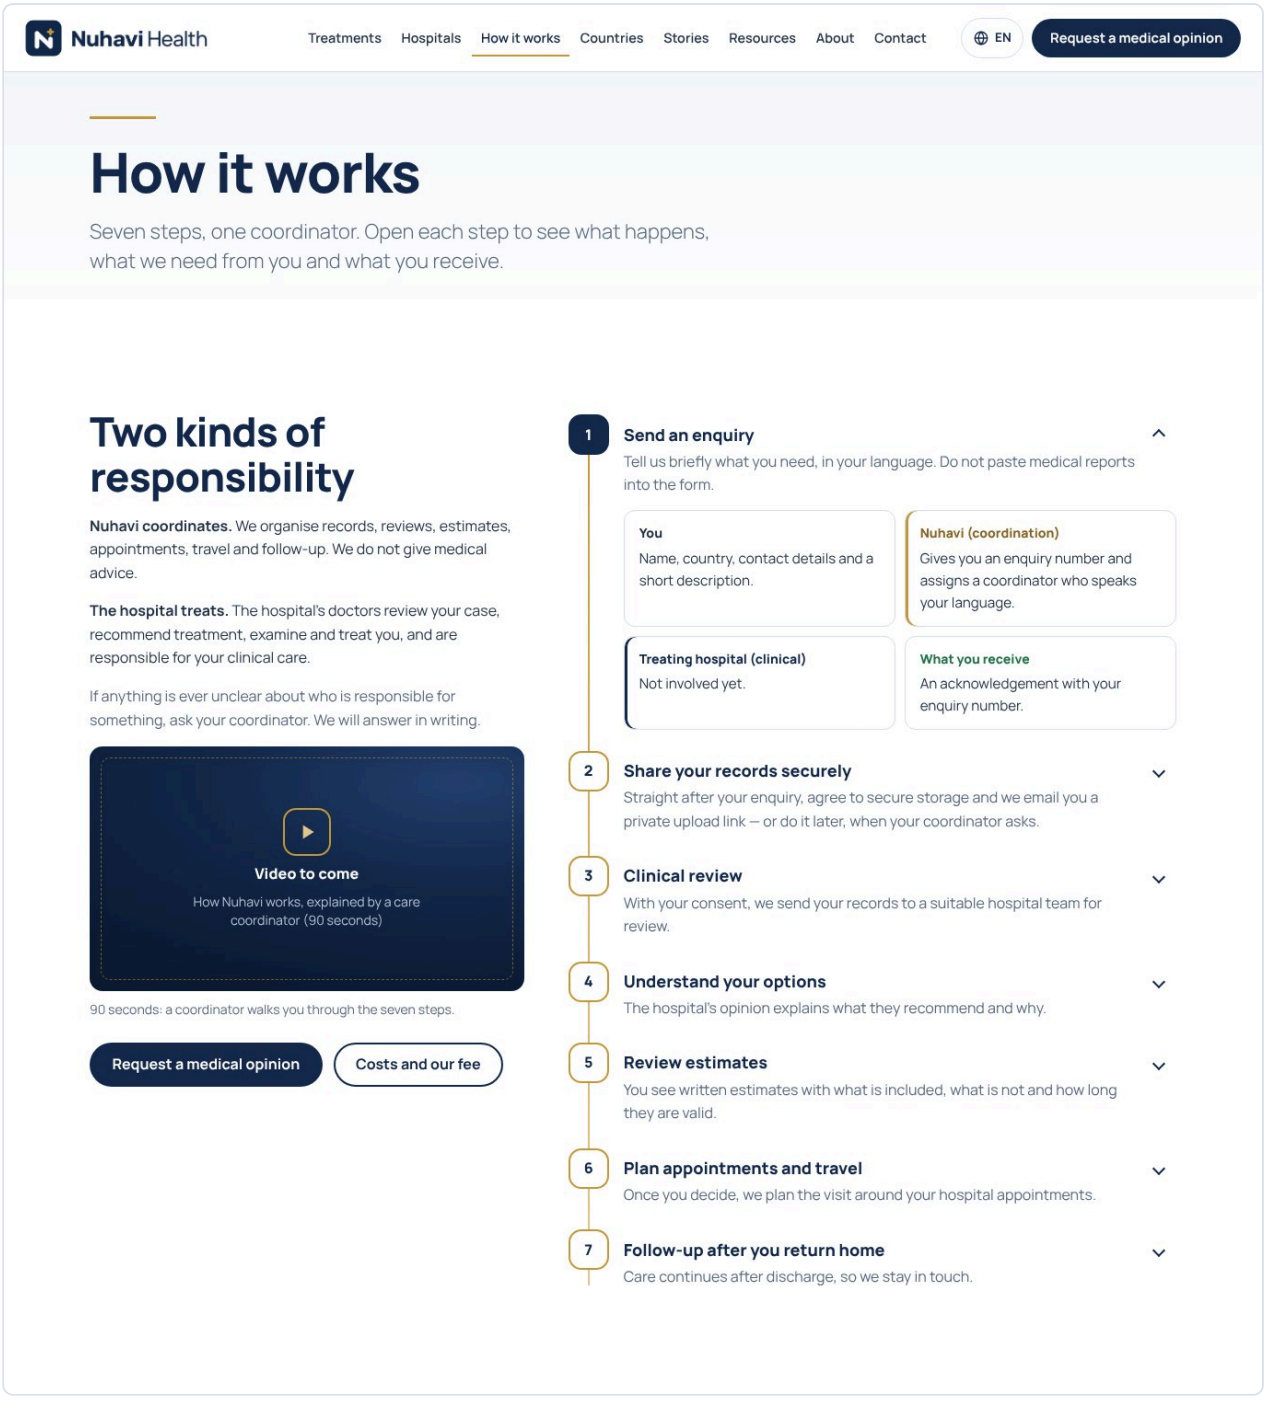

Can I have part of my treatment at home? +

Related guides

- Preparing your medical records
- Questions to ask before choosing a hospital
- Understanding a treatment estimate

How it works /en/how-it-works/

- Responsibility split stated in plain words, then the seven-step journey.
- 16:9 video slot for the coordinator explainer (90 seconds, captions required).

Costs, estimates and our fee /en/how-it-works/costs-and-fees/

- Interactive cost bar; preliminary estimate versus confirmed quotation; the twelve fields every estimate shows.
- Fee panel with gold top edge. Amounts show only after the founders confirm them (FEES.confirmed).

How Nuhavi is paid

You pay us a coordination fee, agreed in writing before you commit.

Needs confirmation: Policy statement to confirm against signed hospital agreements: "Nuhavi Health is paid only by patients. We do not accept referral fees, commissions, marketing payments or any other money or benefit from hospitals, doctors or their agents. Our hospital agreements say so in writing."

Our commercial relationships

Coordination fee

Needs confirmation: Fee amounts proposed in the business plan (US$450 oncology, US$350 orthopaedics). Founders to confirm before publishing.

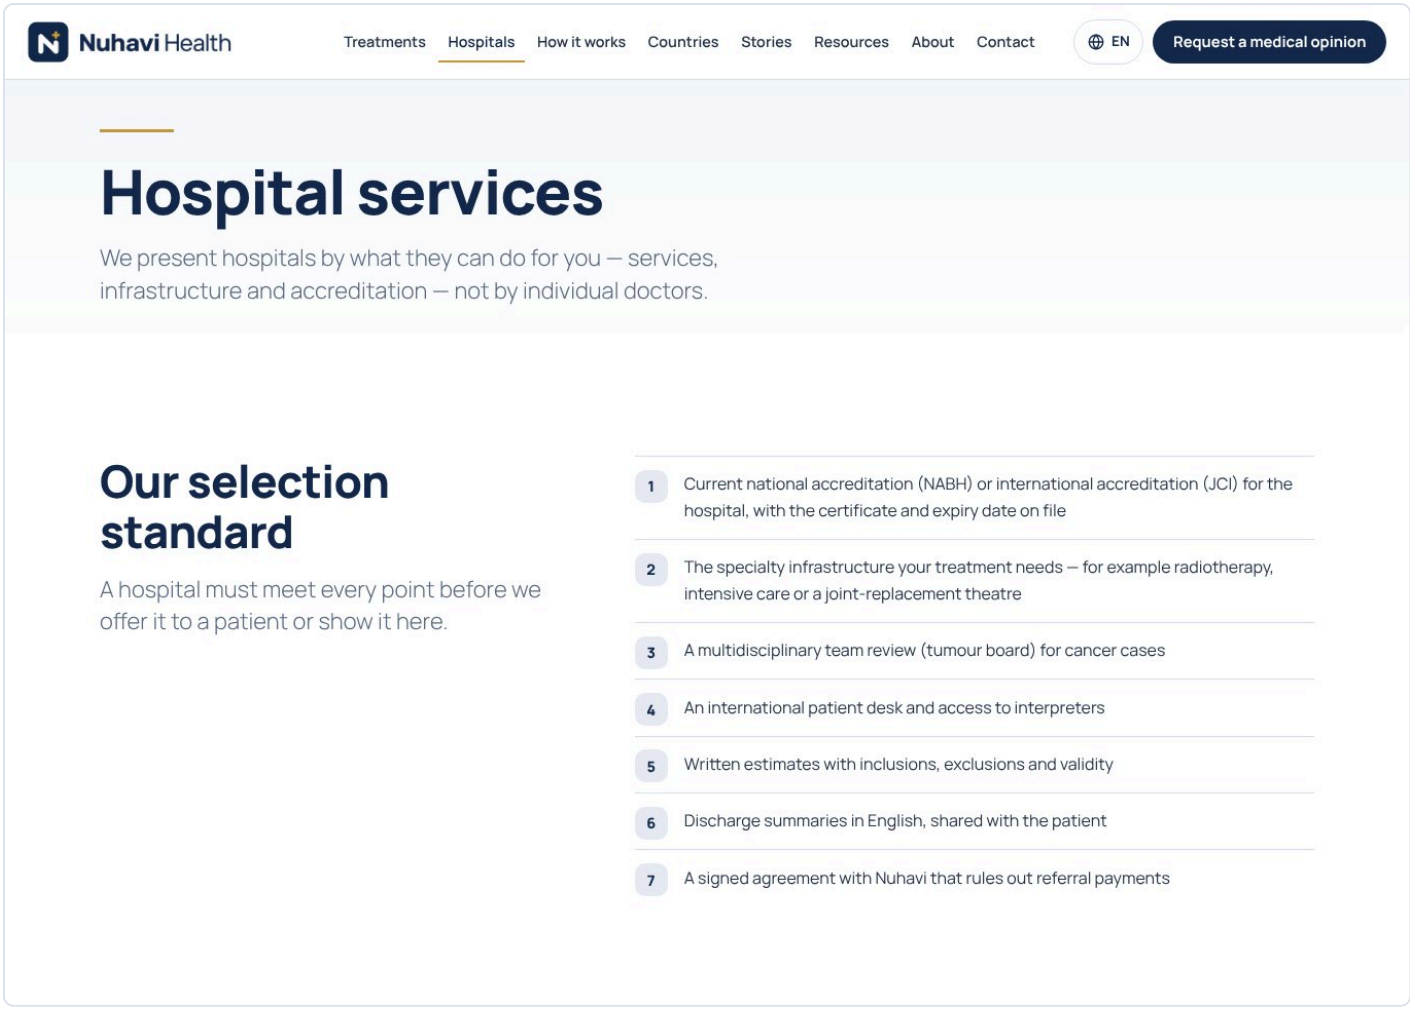

The fee covers

- Coordinating the review of your records by a suitable hospital
- Organising written treatment options and estimates
- Help with the hospital invitation letter for your visa application
- A coordinator who speaks your language, before, during and after treatment
- Follow-up coordination after you return home (period to be confirmed)

Hospital charges are paid to the hospital. Travel and stay are paid to providers unless you ask us to arrange them, in which case we show our charge first.

Hospital services /en/hospitals/

- Numbered selection standard. Hospital profiles appear only with a signed agreement and a dated verification.
- The comparison table shows the layout with example columns only.

Hospital capabilities

No hospital profiles are published yet.

Profiles appear here only after a signed agreement and a dated check of accreditation and services. When we share options for your case, we give you each hospital's name, accreditation and relevant facilities directly.

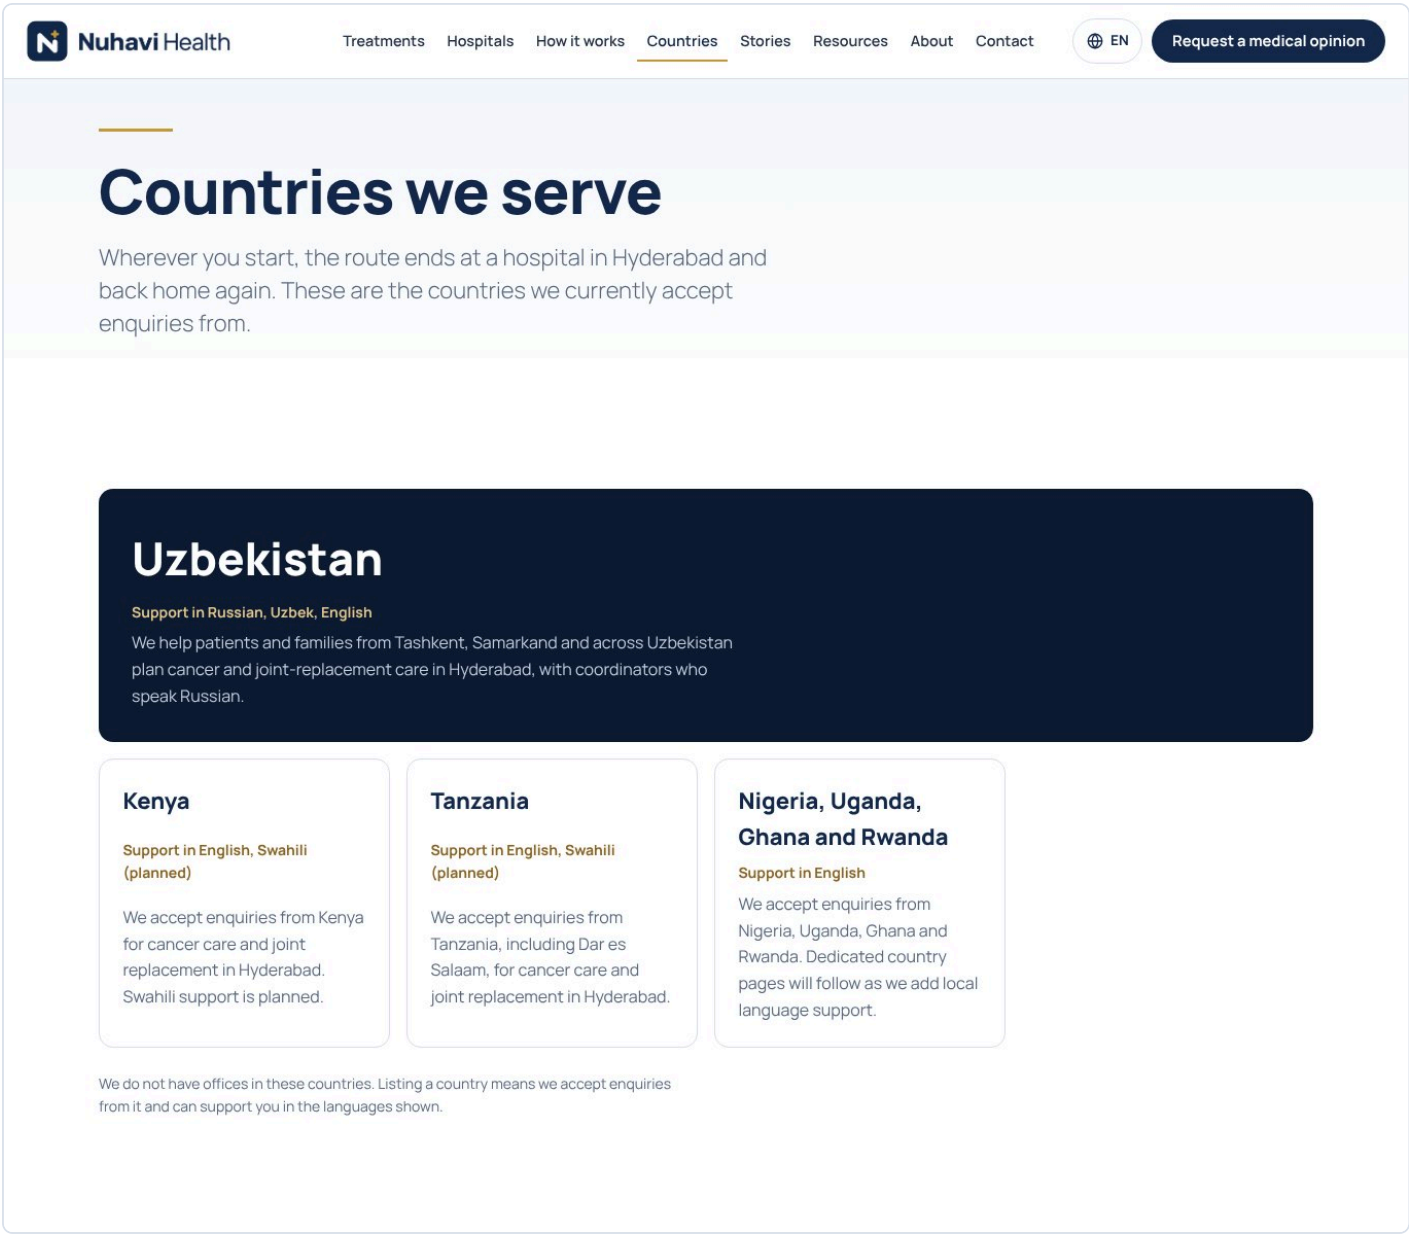

How profiles will compare

Each profile will show the same facts, so you can compare like with like. The column headings below are a layout example, not real hospitals.

What we check	Hospital A (example)	Hospital B (example)
Accreditation and expiry	—	—
Specialty infrastructure	—	—
Team review for cancer cases	—	—
International patient desk	—	—
Interpreters	—	—
Rehabilitation	—	—
Written estimates	—	—
Last verified	—	—

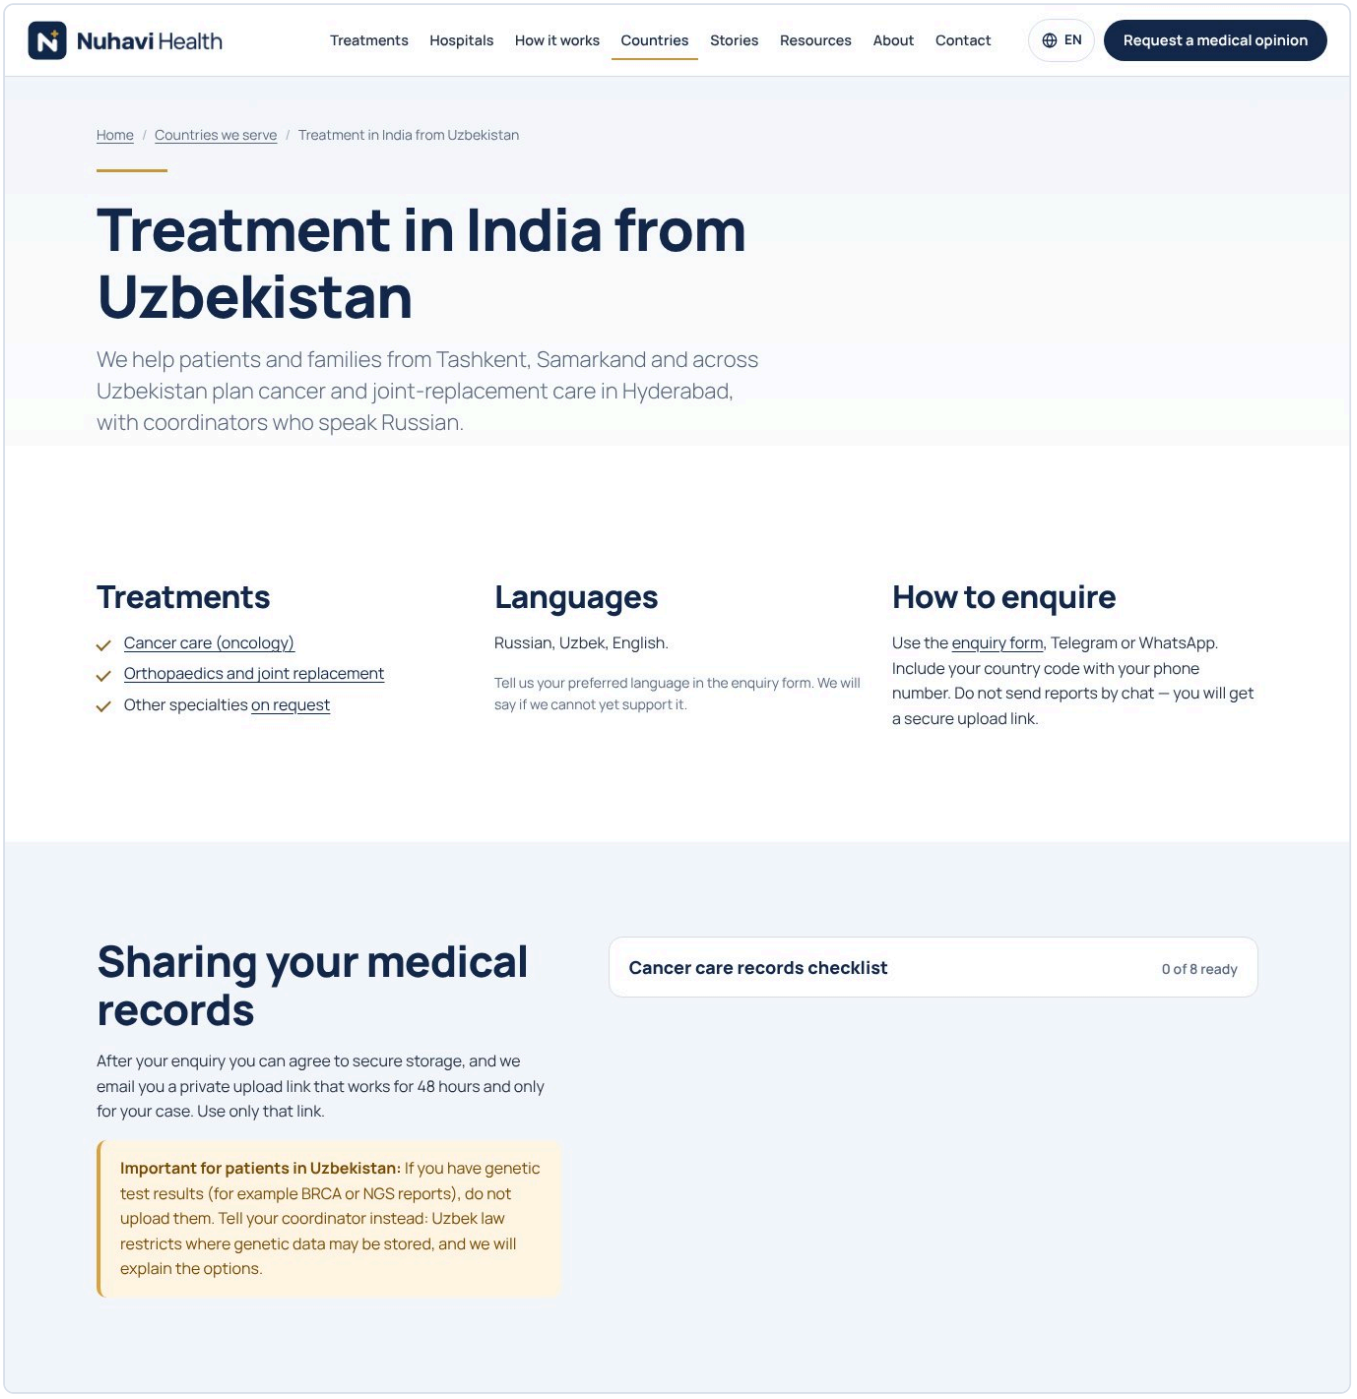

Countries we serve /en/countries/

- Uzbekistan leads as the large navy card; the others are equal cards. A note says listing a country is not a claim of an office.

Country page (Uzbekistan) /en/countries/uzbekistan/

- Telegram is offered first on this page. Genetic-data warning in amber.
- Russian video slot with Uzbek subtitles; accommodation photo slot; travel checklist; emergency notice in red.
- Visa text stays generic and links to the official portal; it never promises approval.

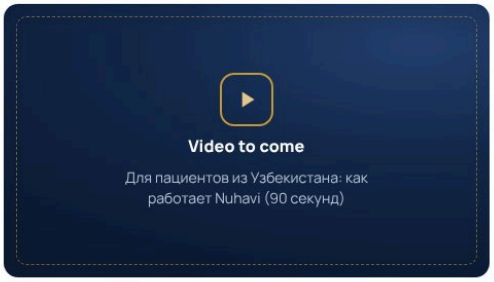

Visa and travel

India offers an e-Medical visa for patients and an e-Medical Attendant visa for family members travelling with them. Eligibility, validity and fees are set by the Government of India and change from time to time, so always check the official portal before applying.

A hospital invitation letter is usually needed. We help you request it once a hospital has reviewed your case. We cannot guarantee that any visa will be approved.

Official Indian visa portal (opens in a new tab)

Direct and one-stop flights connect Tashkent with Hyderabad. We confirm current schedules and the best option when we plan your trip.

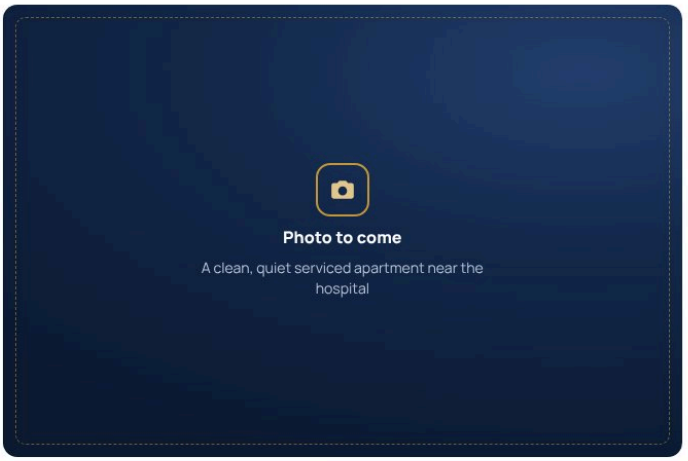

In Russian, with Uzbek subtitles.

Travelling with family

Most hospitals ask that an adult companion stays with you. We help plan their visa, stay and day-to-day needs too.

Payment

Hospital charges are paid to the hospital, normally by bank transfer or at the hospital. Nuhavi's coordination fee is invoiced separately. If you ask us to arrange accommodation or transport, we show what we charge for it before you agree.

Accommodation near the hospital, if you want us to arrange it.

Travel checklist

0 of 8 ready

- [ ] Passport valid for at least six months
- [ ] e-Medical visa applied for (and e-Medical Attendant visa for your companion)
- [ ] Hospital invitation letter
- [ ] Flights booked after visa approval
- [ ] Travel insurance checked
- [ ] Original medical records and scan discs packed in hand luggage
- [ ] Medicines for the journey
- [ ] Coordinator's phone number saved

Print this checklist

Is this an emergency?

Chest pain, sudden weakness or numbness, difficulty speaking, severe bleeding, a seizure or difficulty breathing need care now. Go to the nearest emergency department or call your local emergency number. Do not wait for an enquiry reply.

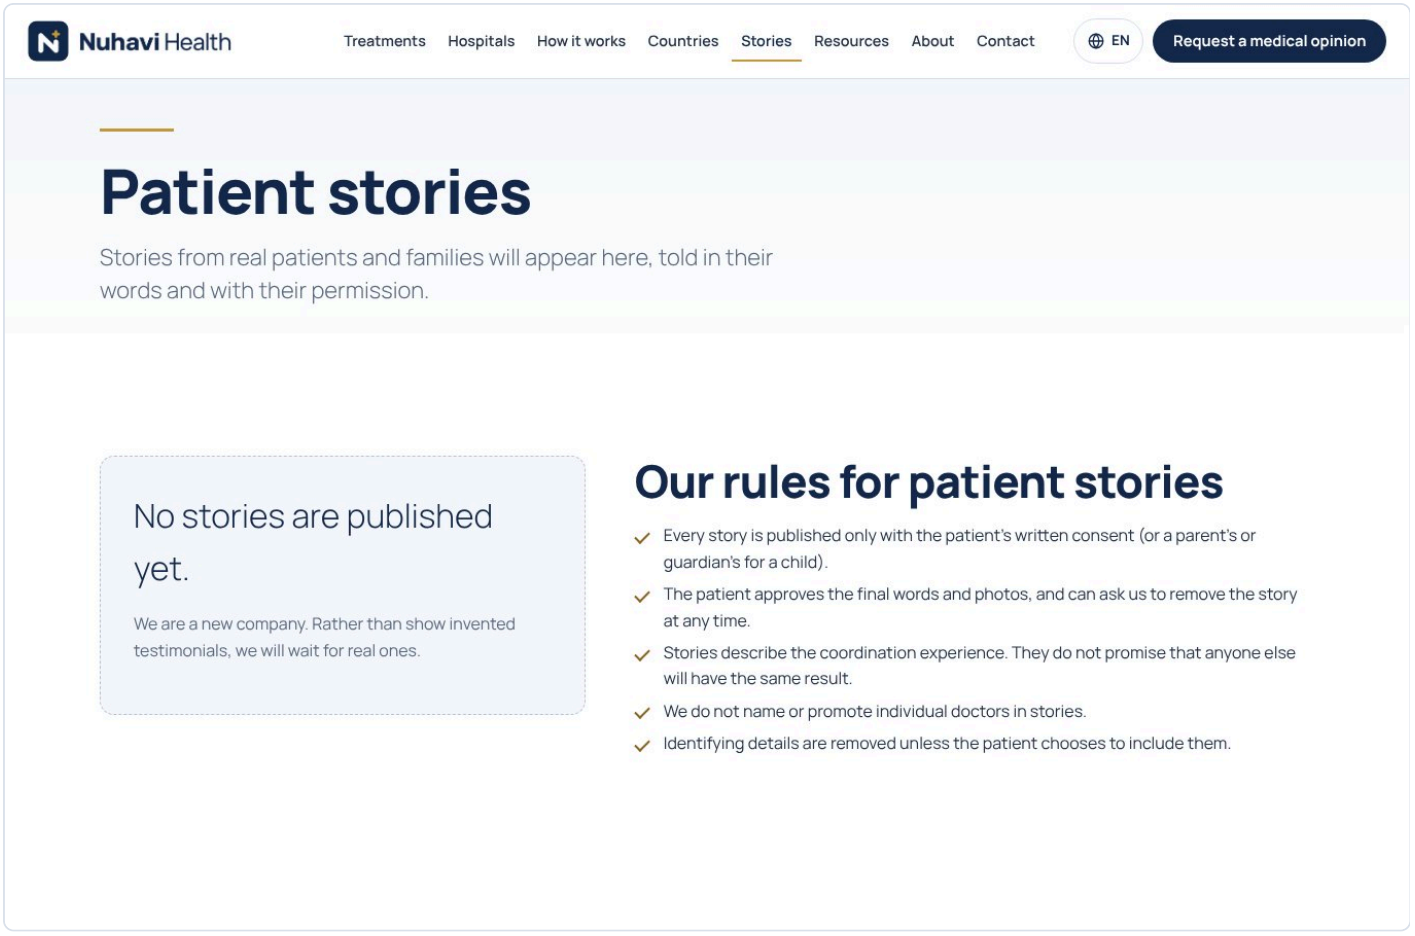

The coordination process

The same seven steps, wherever you live.

1. Send an enquiry
2. Share your records securely
3. Clinical review
4. Understand your options
5. Review estimates
6. Plan appointments and travel
7. Follow-up after you return home

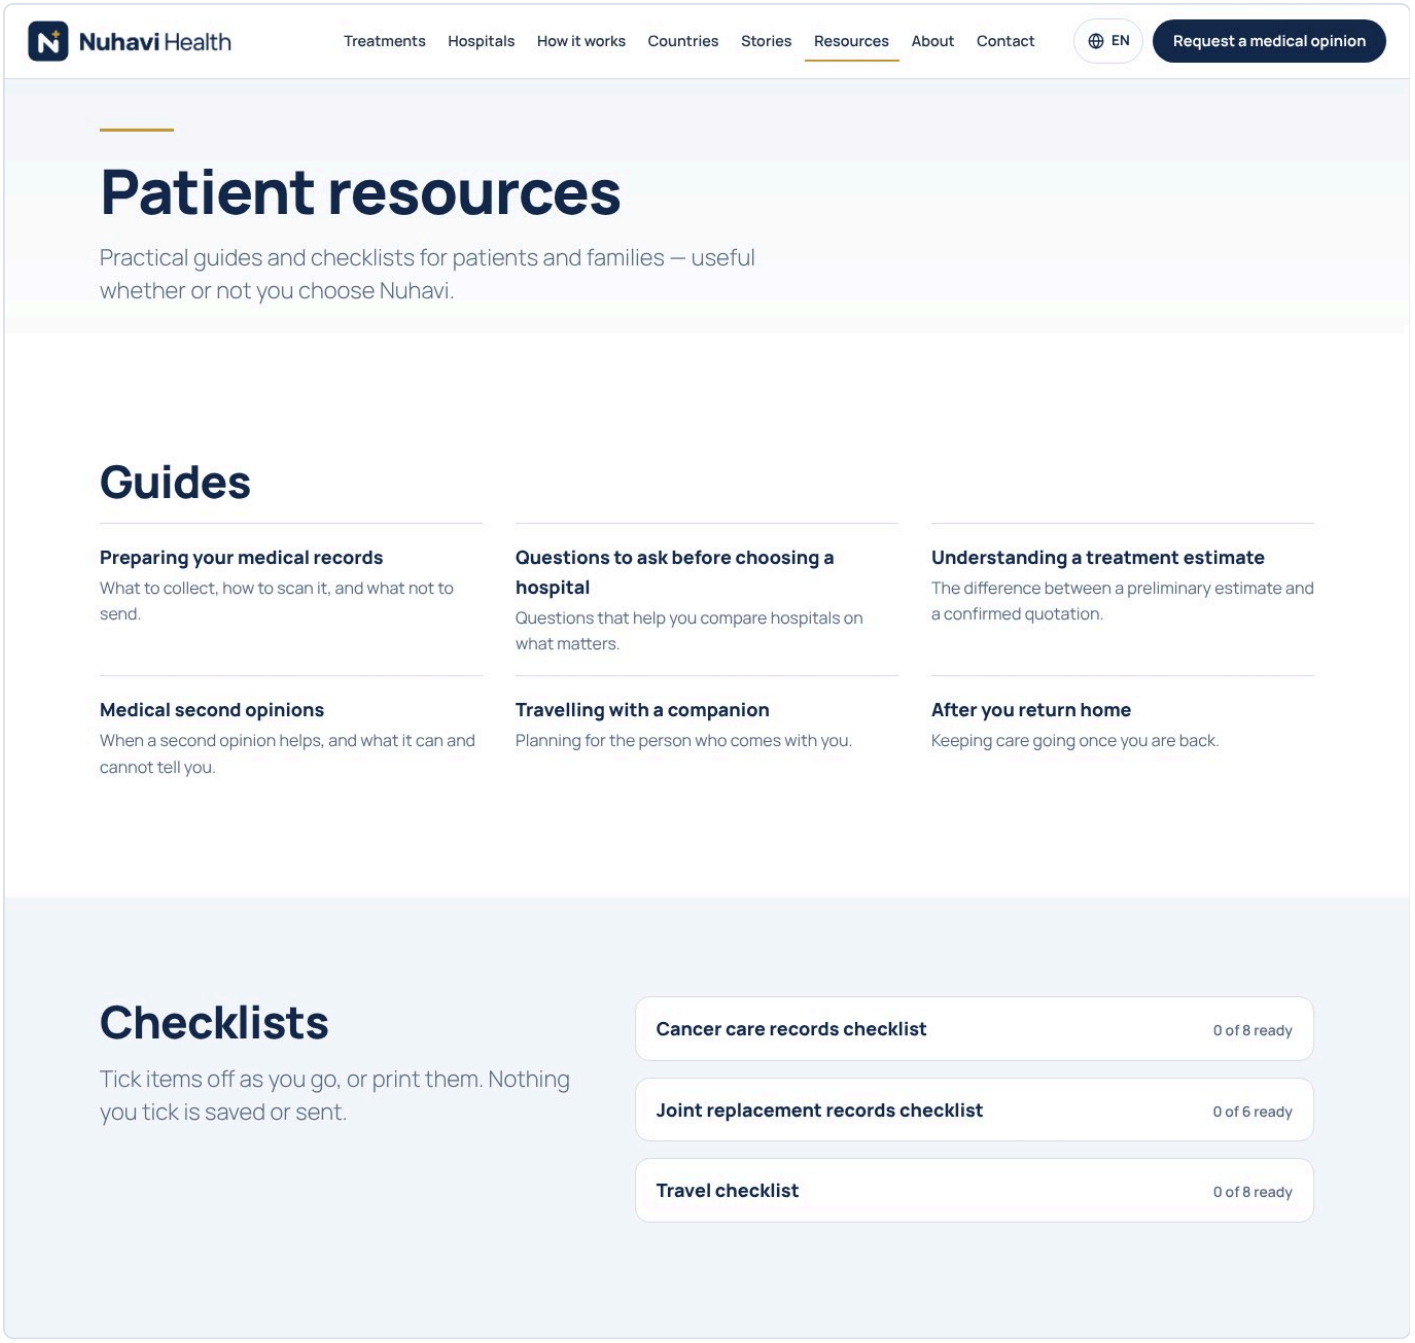

Patient stories /en/stories/

- Empty by design until real patients give written consent. Rules are published.

Patient resources /en/resources/

- Six guides, three printable checklists, FAQ accordion with structured data.

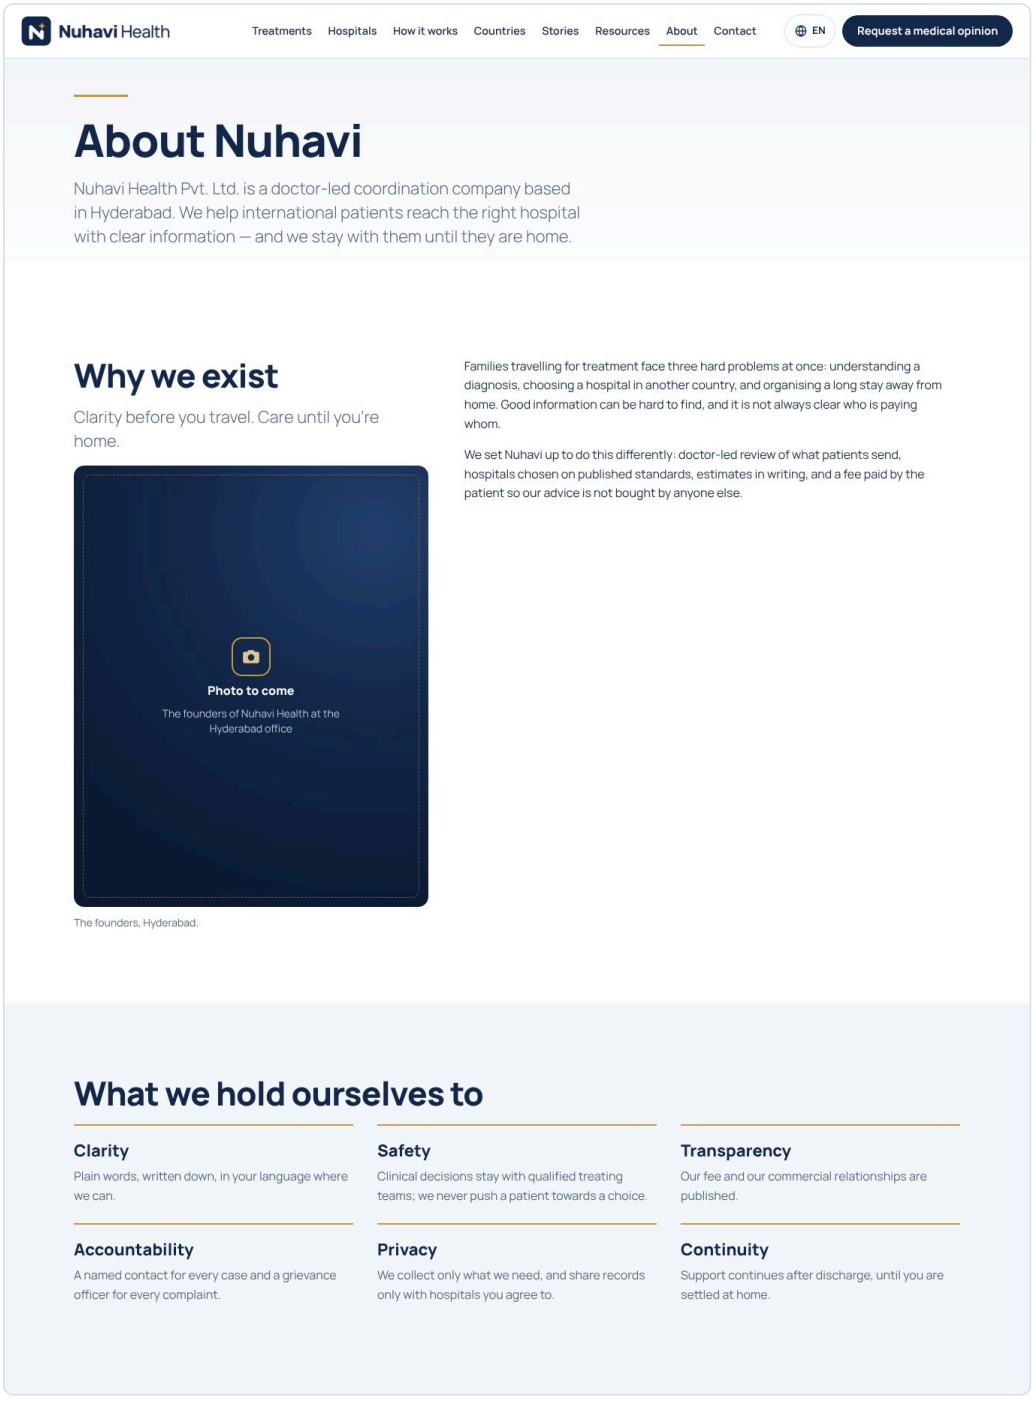

Frequently asked questions

- Is Nuhavi a hospital? +
- Who pays Nuhavi? +
- Do you promote particular doctors? +
- Can you guarantee a result, a saving or a visa? +
- How do I send my medical records? +
- Which languages do you support? +
- What if I have an emergency? +

About Nuhavi /en/about/

- Founders photo slot (4:5) with names and roles: governance, not doctor promotion.
- Values in a two-column grid with gold top rules.

Clinical governance

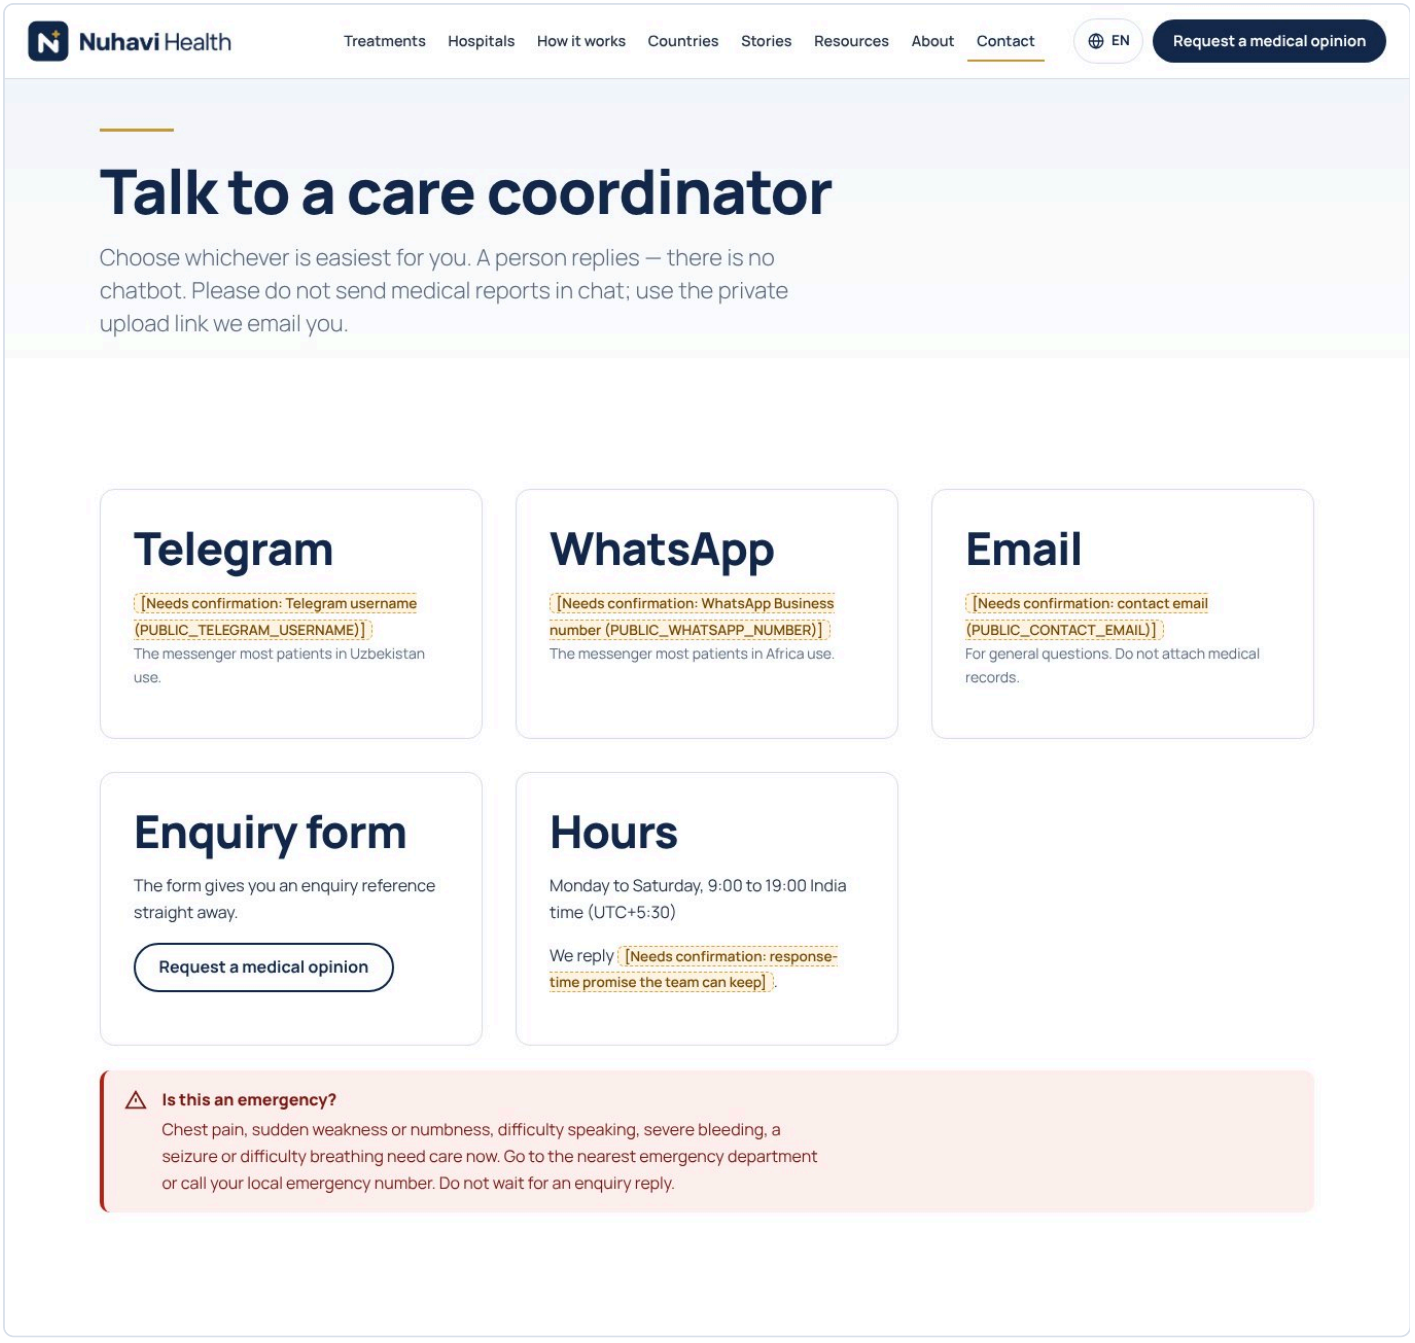

Who checks our clinical information, and where our role ends and the hospital's begins.

Commercial relationships

How we are paid, and every relationship that could affect our advice.

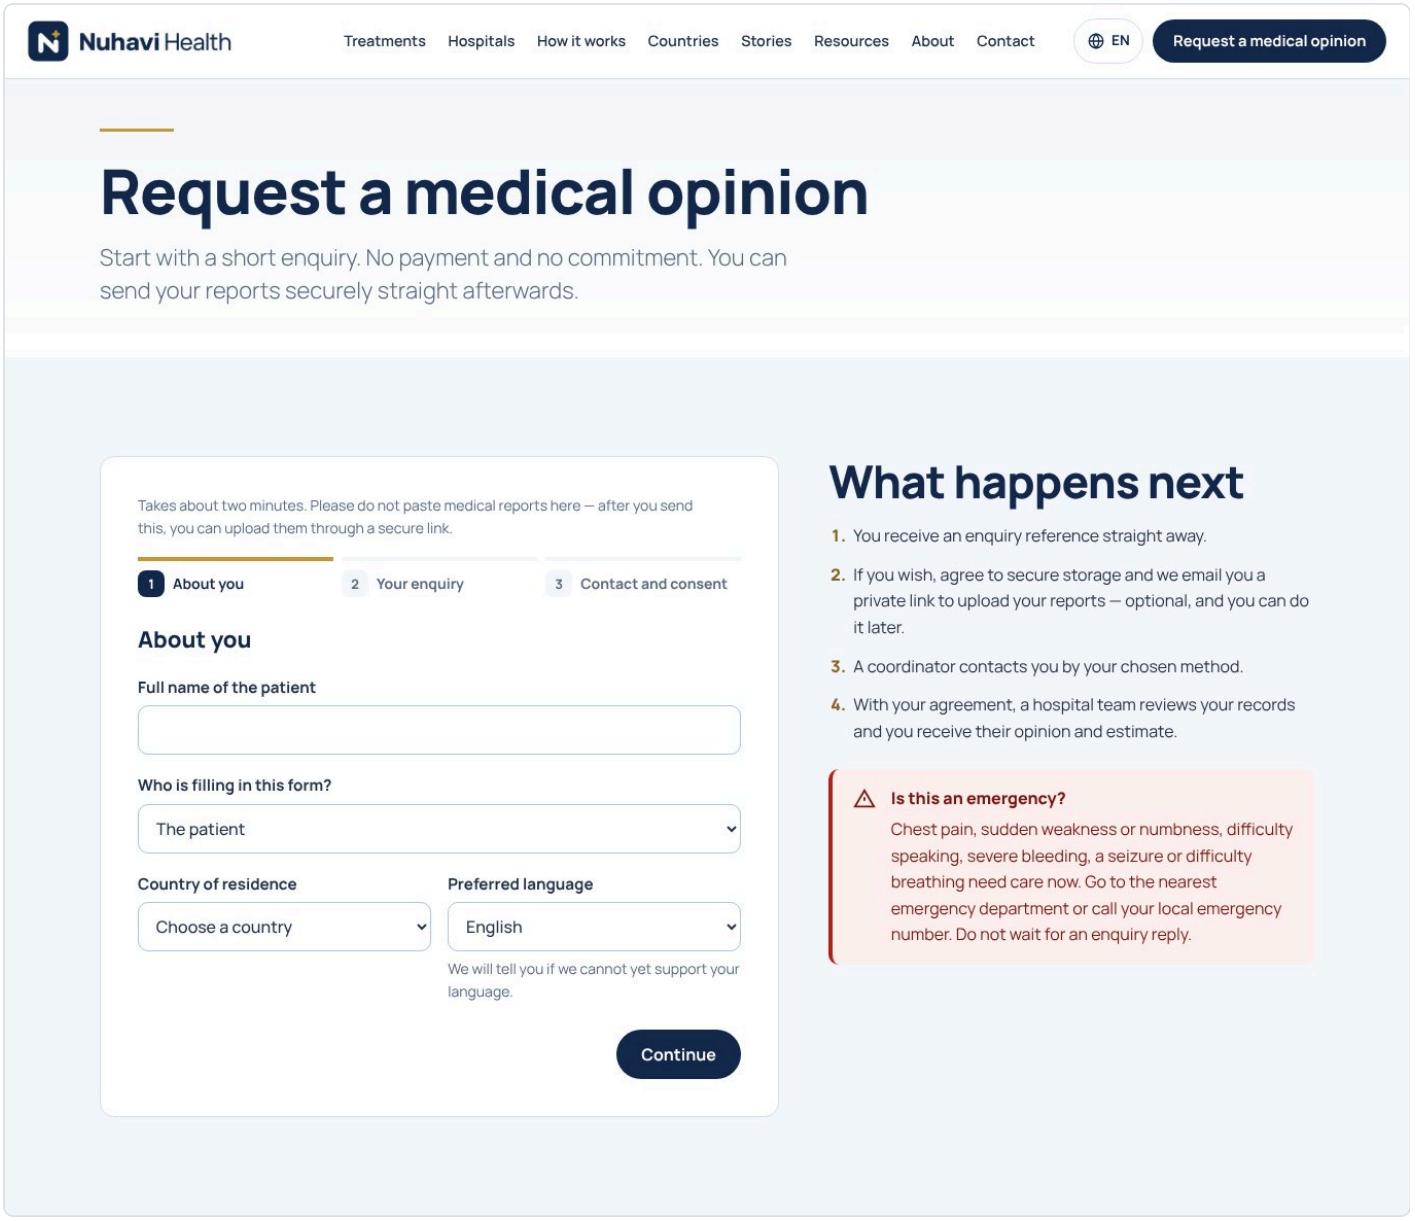

Contact /en/contact/

- Telegram, WhatsApp, email, form and hours. A person replies, there is no chatbot. Amber markers show missing numbers.

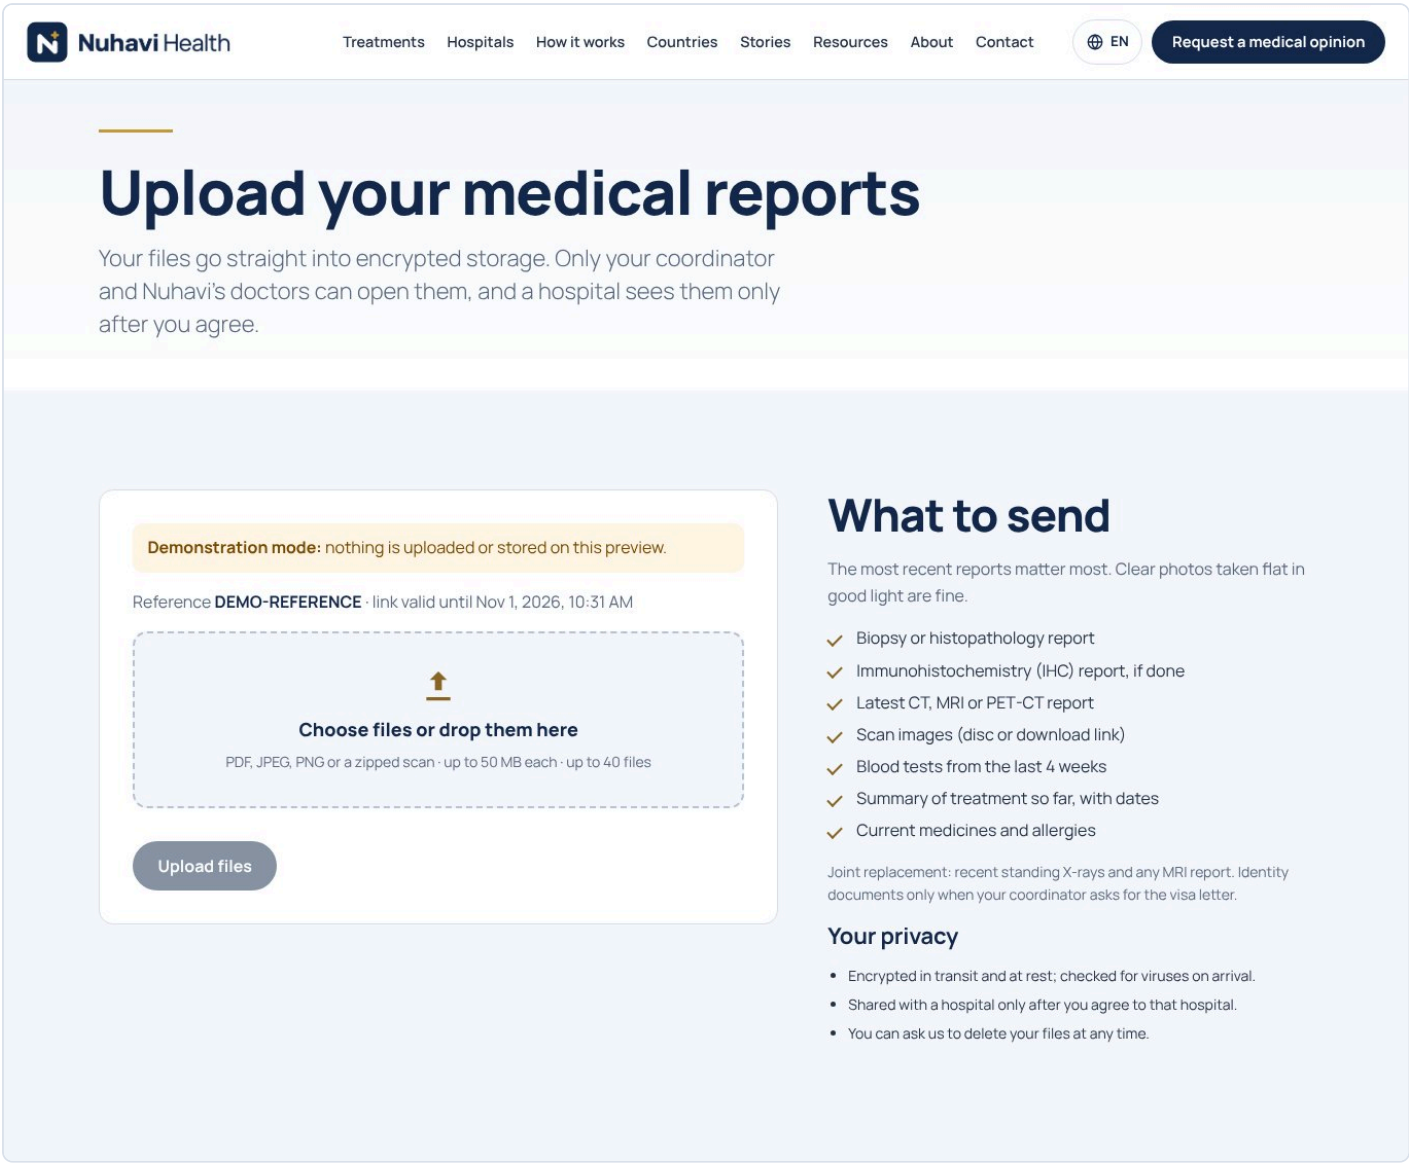

Request a medical opinion /en/request-opinion/

- Three-step form with a progress bar. The states are on the "Interaction states" pages.

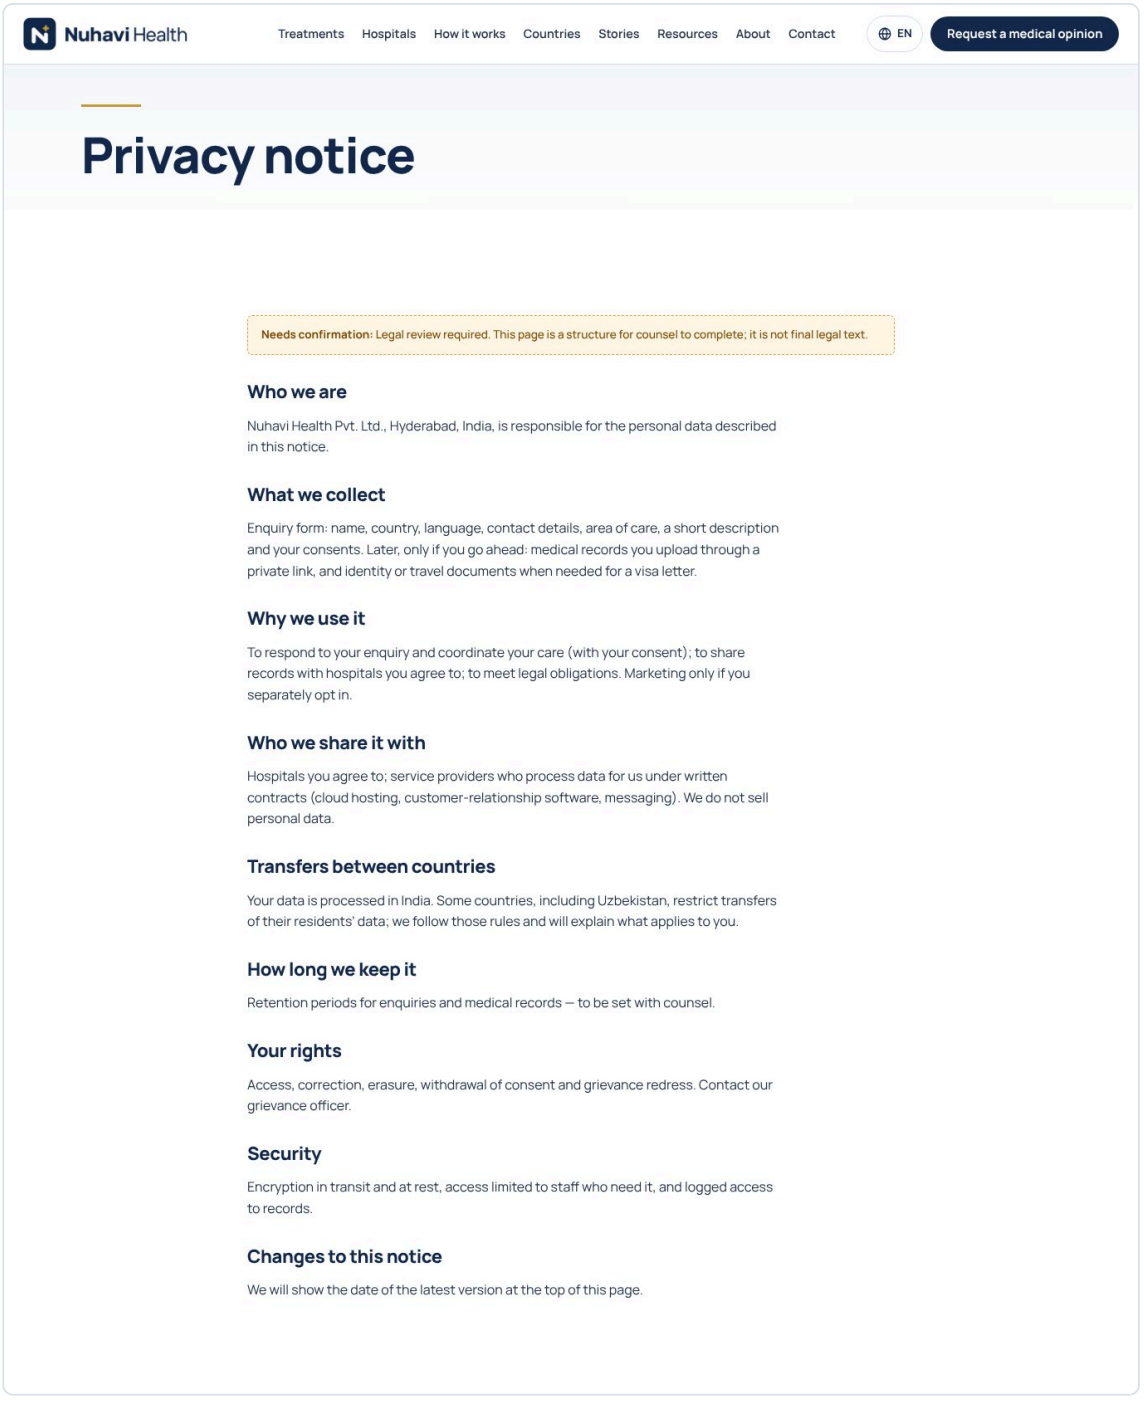

Secure upload page `/en/records/`

- Opened only from the emailed link. Not indexed, no chat button, no analytics.
- The preview shows a labelled demonstration. In production without the records API, it says "opening soon".

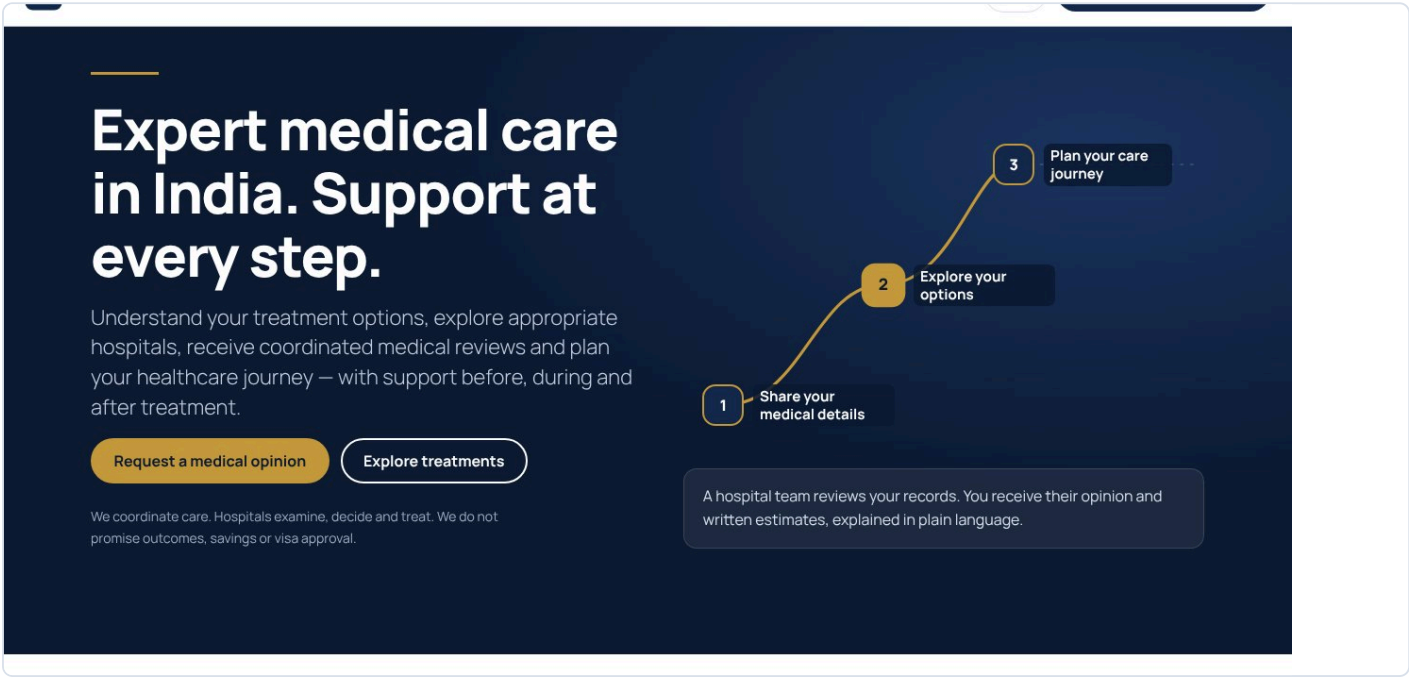

Legal page (privacy notice) /en/legal/privacy/

- All six legal pages share this layout. The amber banner stays until counsel provides the final text.

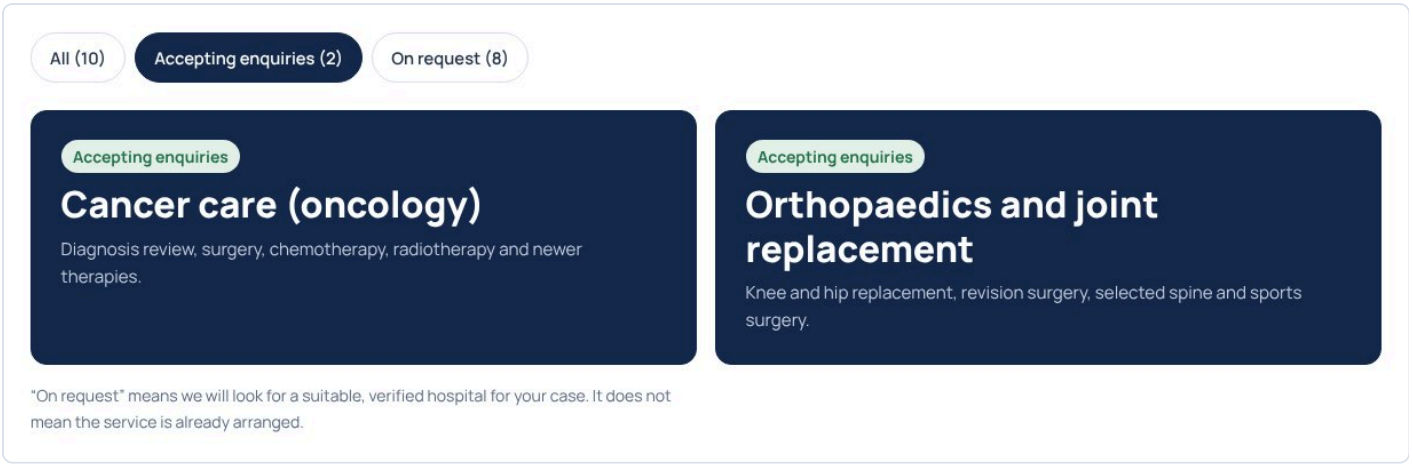

4 · Interaction states

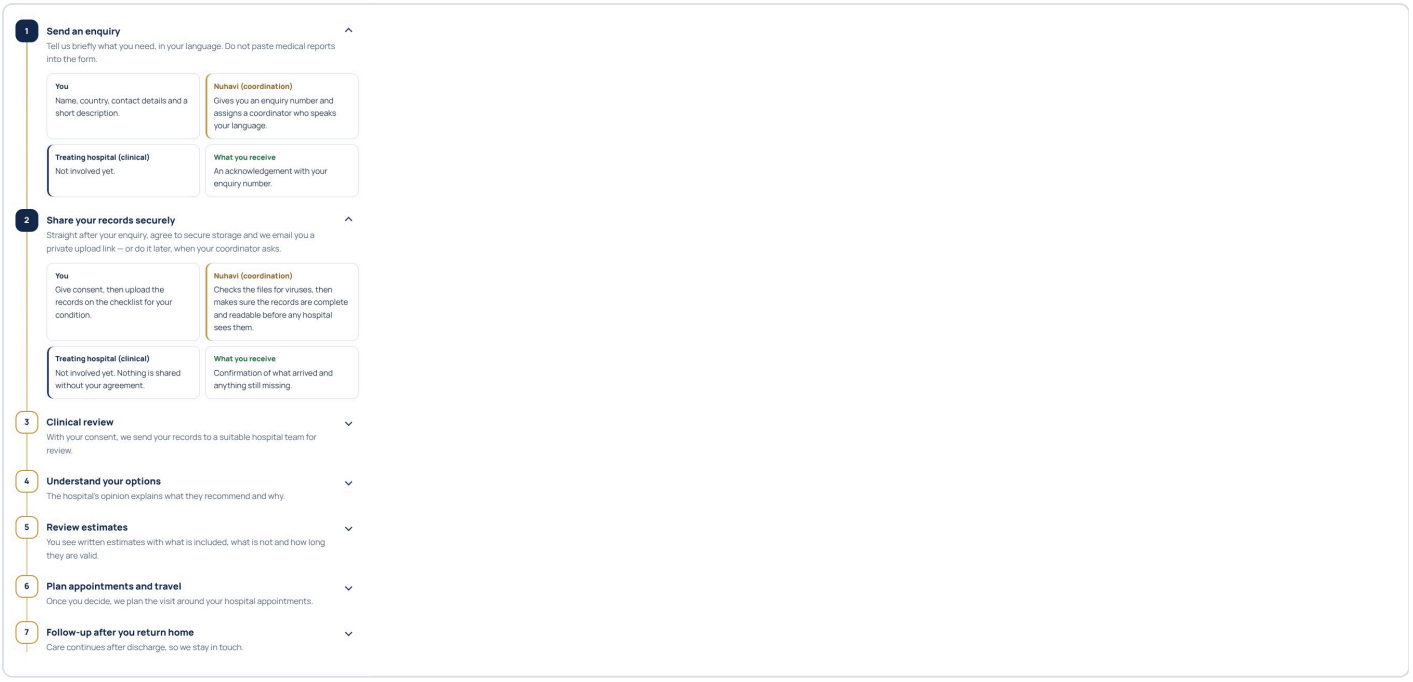

How the interactive parts look after the visitor acts. Build and test each state.

Hero route, stop 2 selected
Each stop is a button; the panel text changes. Keyboard and screen-reader accessible.

Specialty filter: "Accepting enquiries"
Filters hide tiles in place; without JavaScript every tile shows.

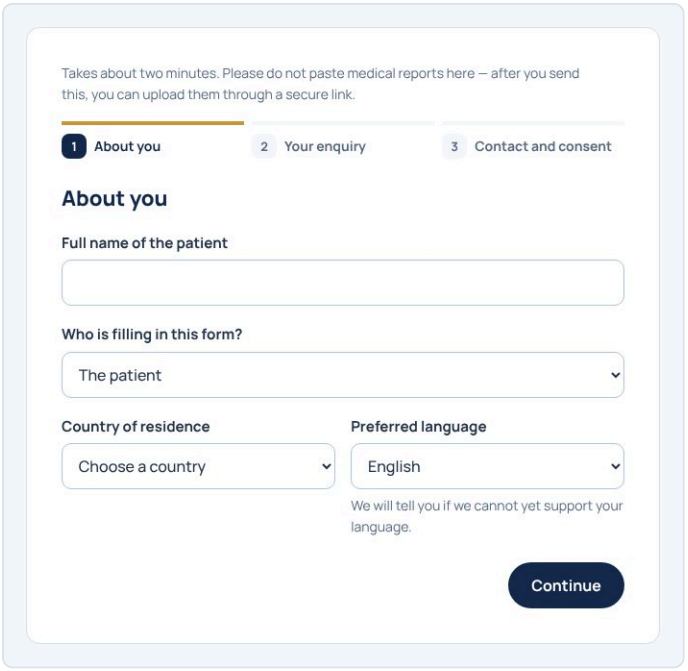

Journey step opened

Native disclosure; four boxes: You · Nuhavi · Hospital · What you receive.

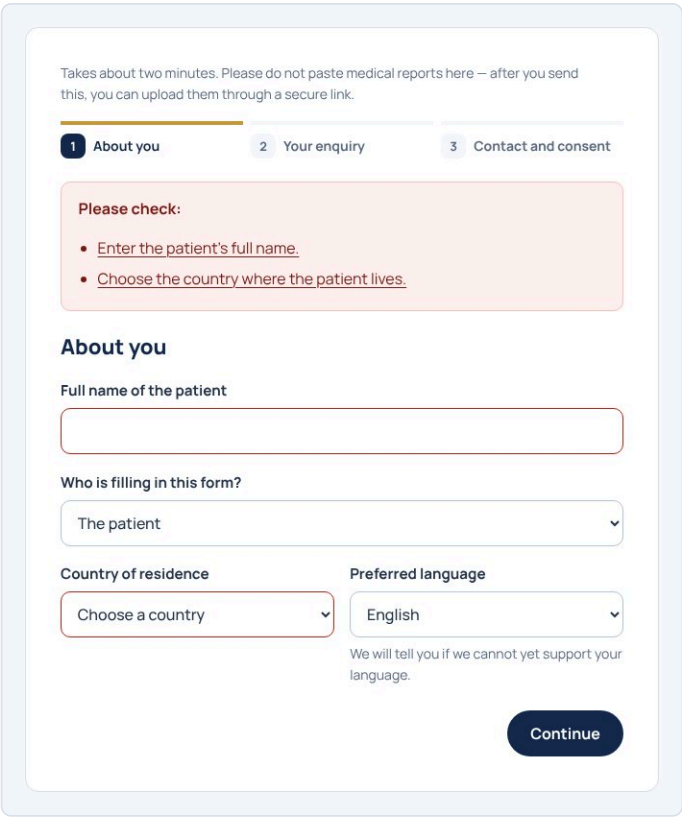

Cost bar: medicines and implants selected

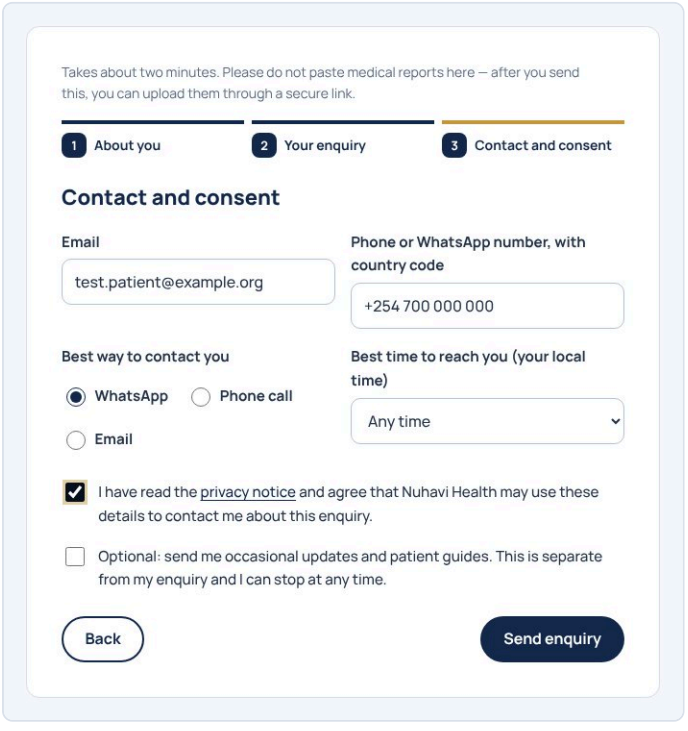

Hover, tap or focus changes the explanation; segment widths are illustrative only.

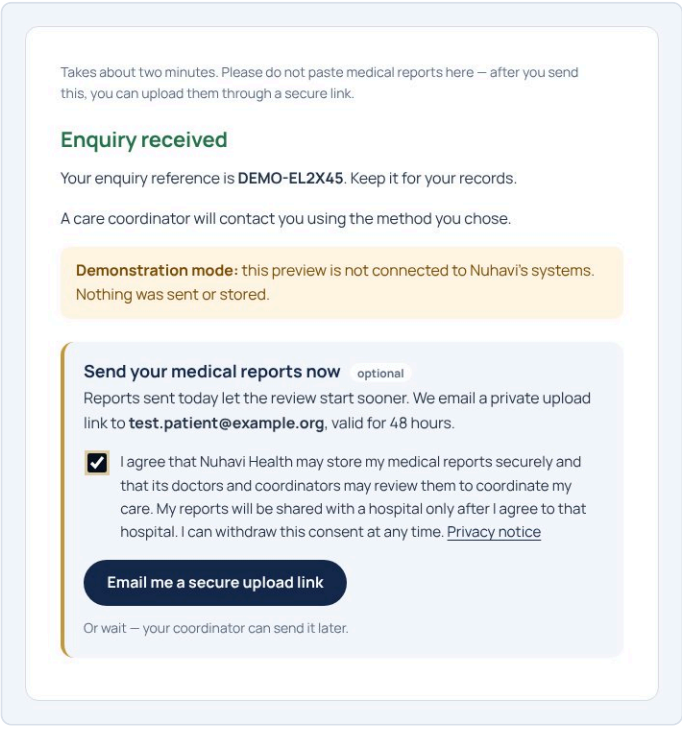

Form, step 1
Progress bar in gold; one question group per step.

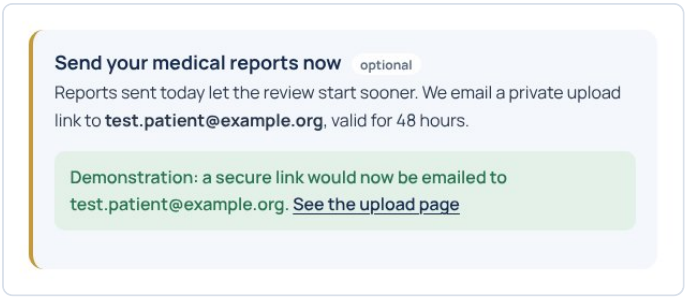

Form, validation errors
Errors listed at the top, linked to their fields, announced to screen readers.

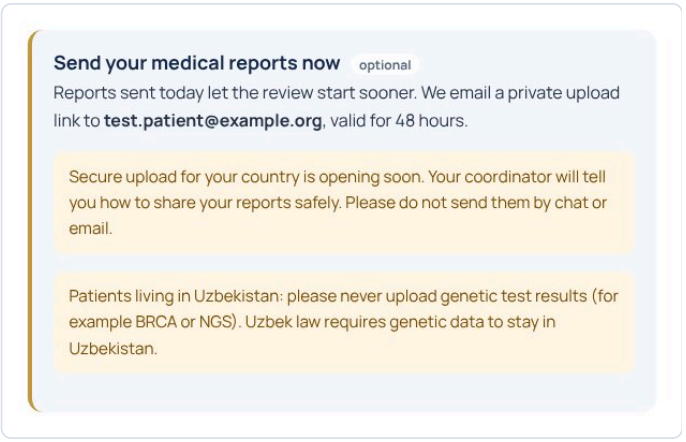

Form, step 3 (contact and consent)
Enquiry consent and marketing consent are separate boxes.

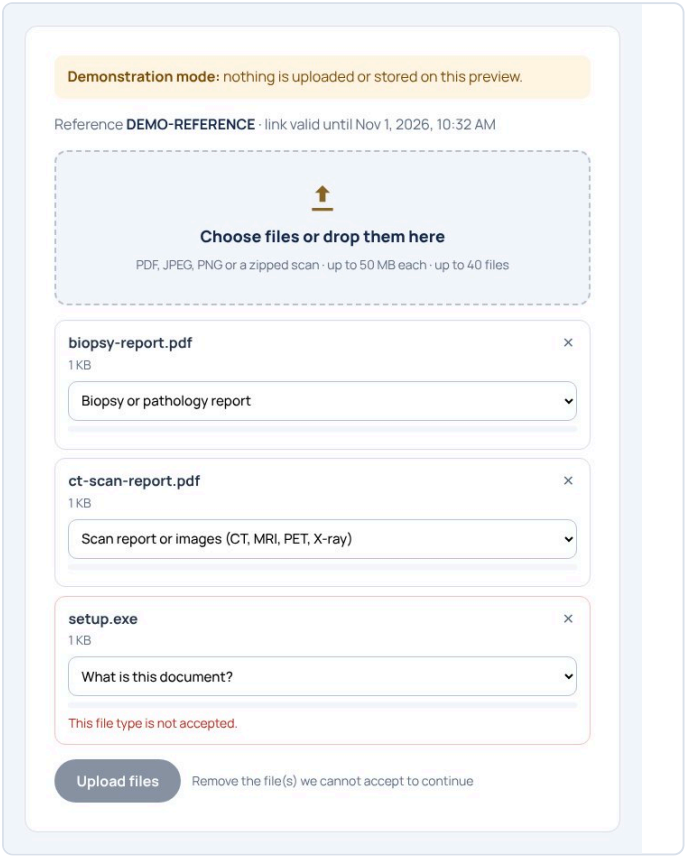

After sending: "Send your medical reports now"
Optional. Separate health-data consent must be ticked before the button works. The demonstration label appears only in preview builds.

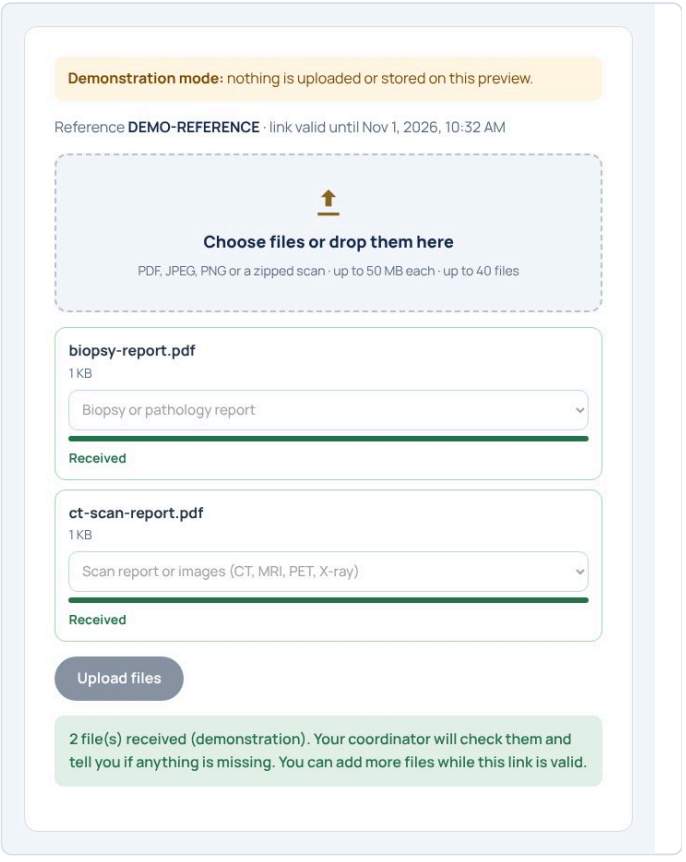

Link requested
Confirmation in green. In production the link is emailed; the preview links to the demo upload page.

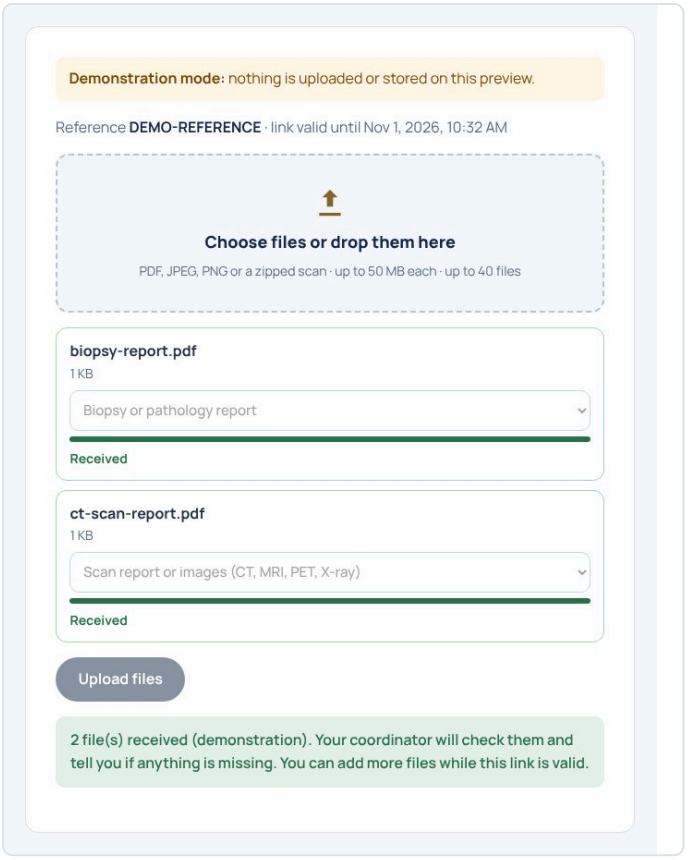

Patient in Uzbekistan (production behaviour)
Upload stays closed until counsel confirms the transfer route; the genetic-data warning always shows.

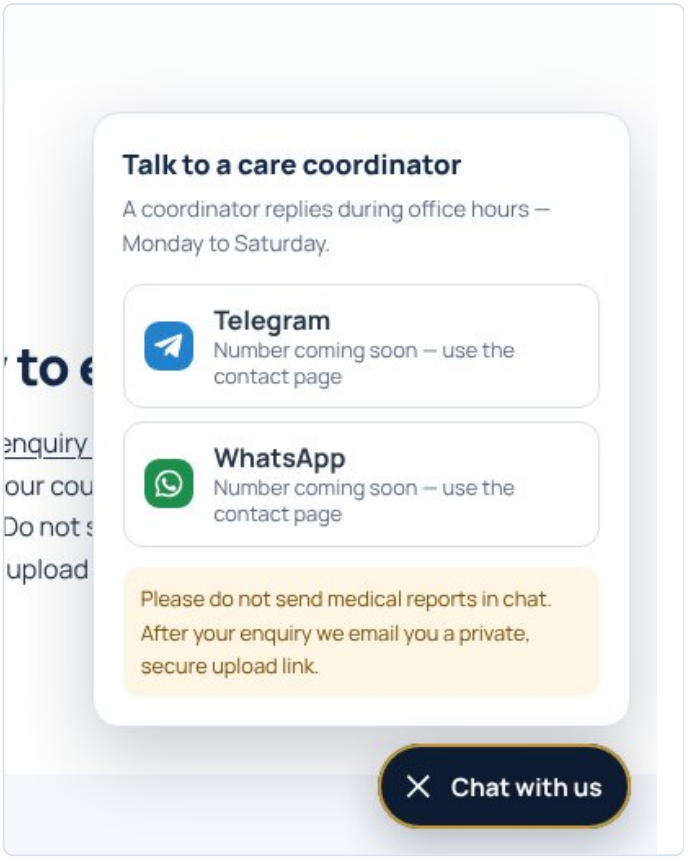

Upload page: files chosen
Each file needs a document type. Unaccepted files are flagged and must be removed before uploading.

Upload page: received
Per-file progress bar; green "Received"; summary message.

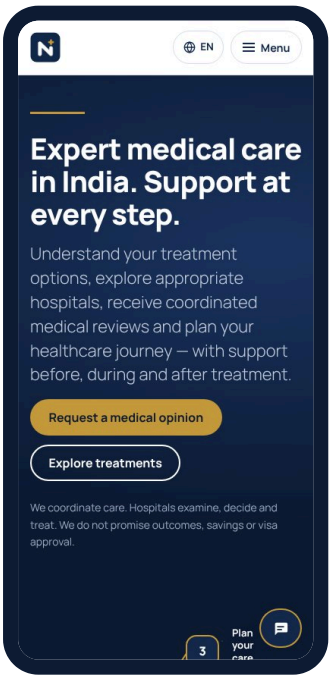

Upload page: Uzbek resident
Genetic test option removed and a warning shown.

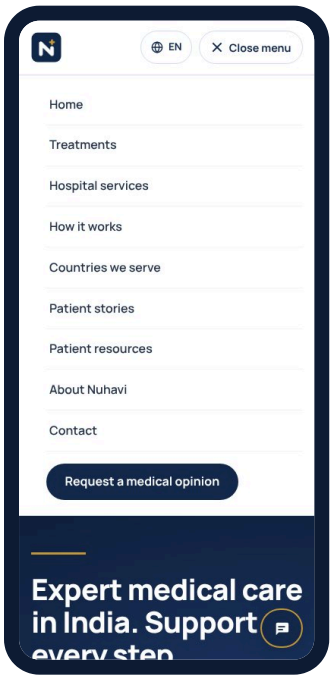

Chat panel on desktop (Uzbekistan page)
Telegram first here; WhatsApp first on English pages for Africa. Warns not to send reports in chat.

5 · Mobile (390 px)

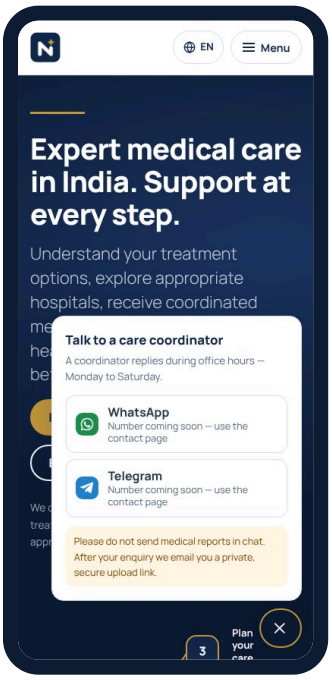

Most patients will arrive on a phone, often on a slow connection. The chat button collapses to an icon; the menu becomes a full-width list.

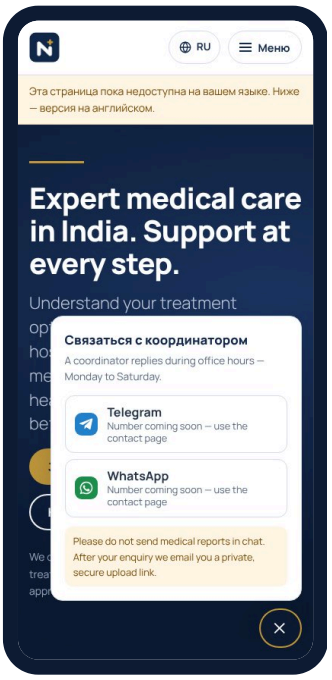

Home, first screen

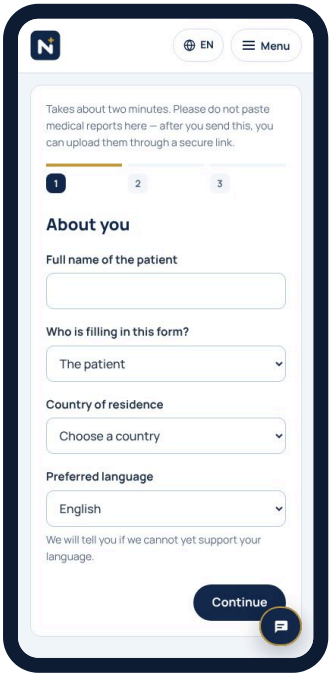

Menu open

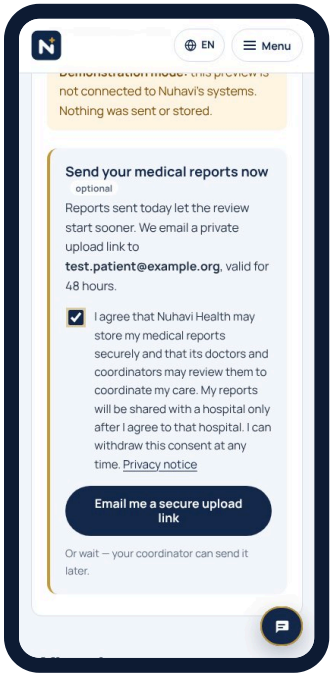

Chat panel (English pages)

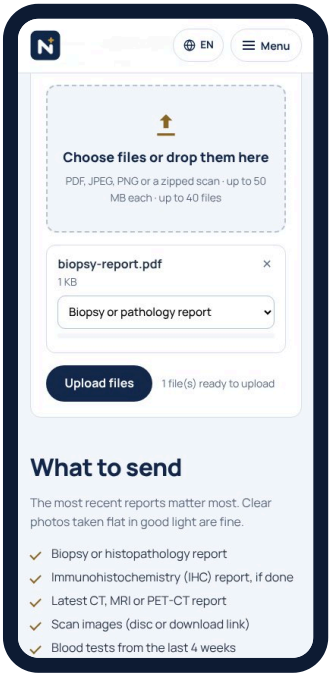

Chat panel (Russian pages: Telegram first)

Enquiry form

Upload offer after sending

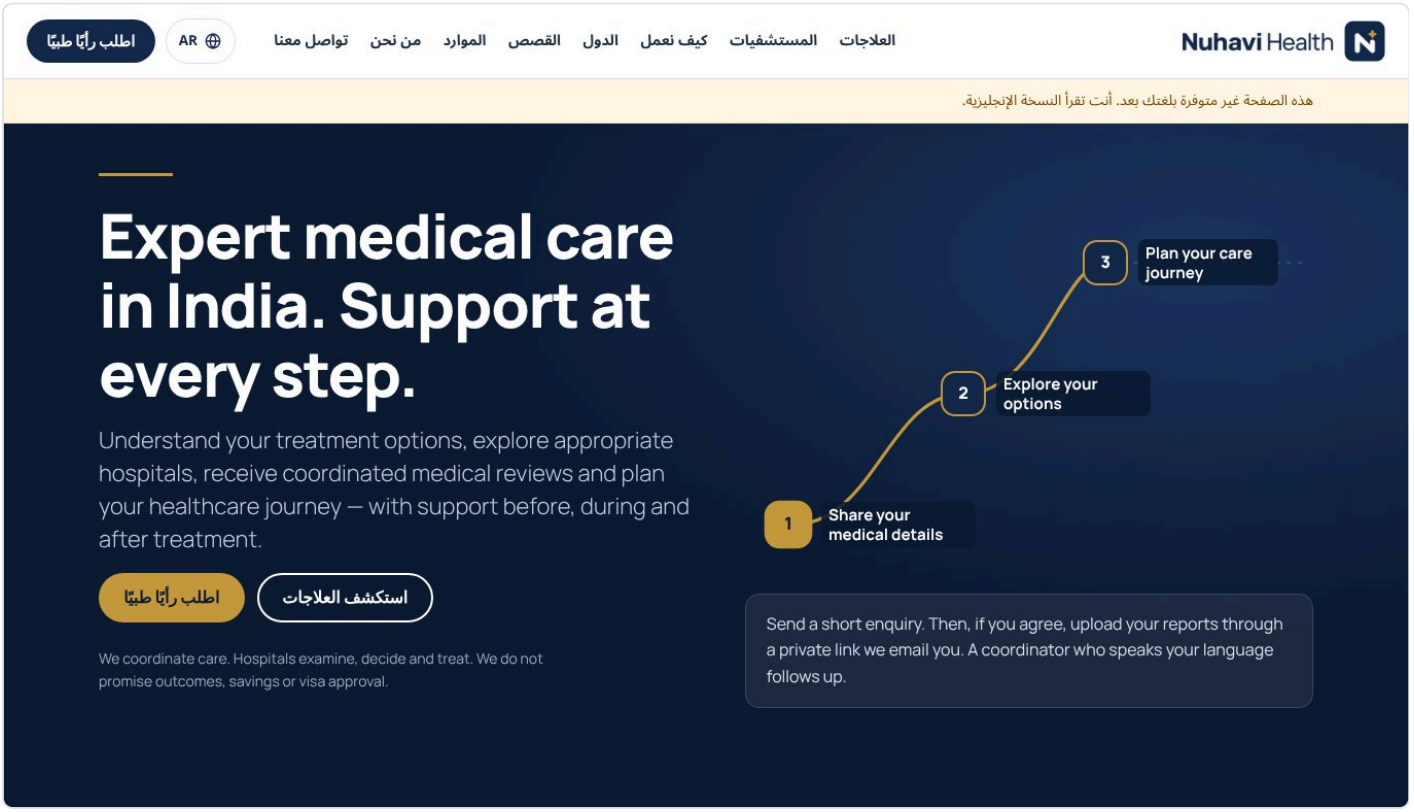

Upload page

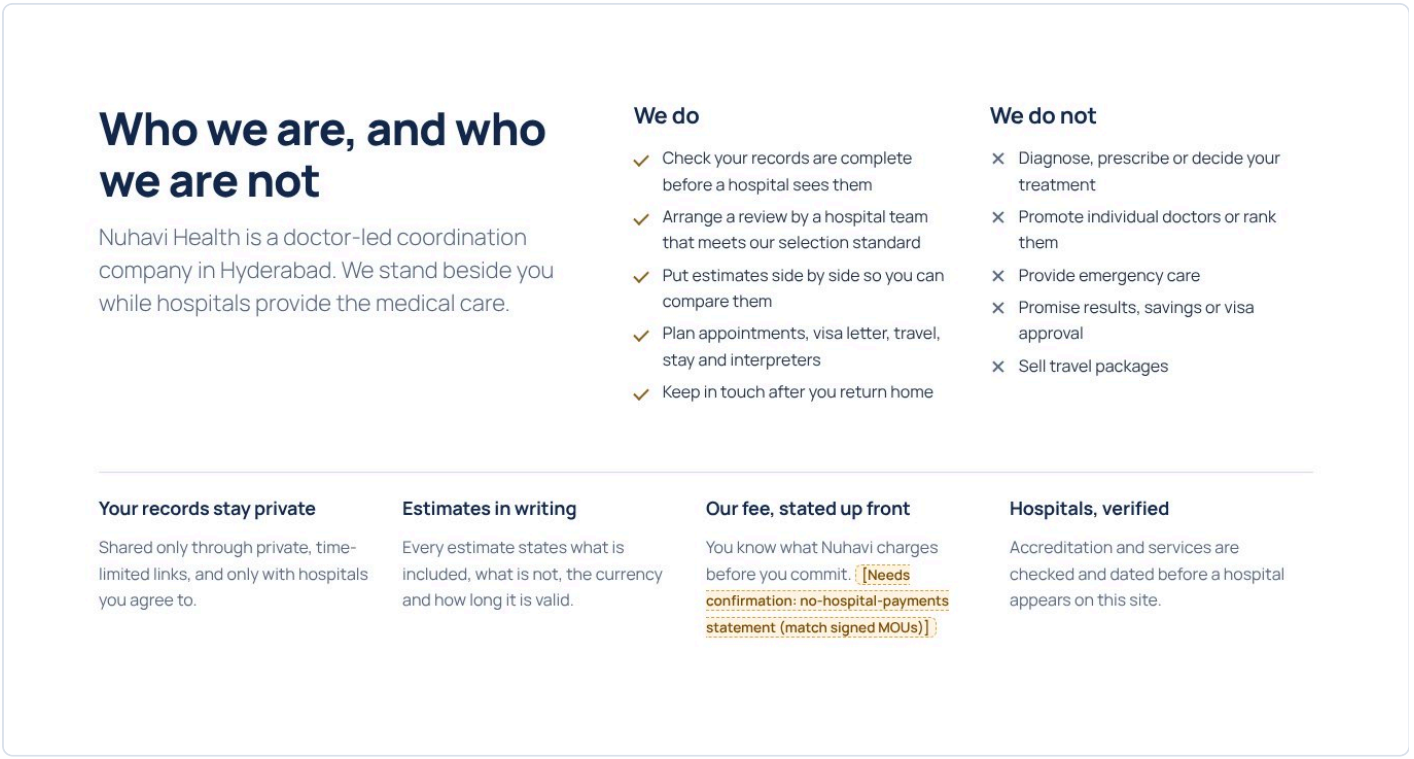

Uzbekistan page

6 · Arabic preview (right to left) /ar/

- The interface mirrors: logo on the right, navigation right to left, the route line flips. Page text stays English with a notice until a professional translation is reviewed. Russian works the same way, left to right.

7 · "Looks right" acceptance checklist

Before launch, check every item against the deployed site on a laptop and a mid-range Android phone.

- [ ] Every page matches this document at 1366 px and 390 px; no horizontal scrolling at 360 px.
- [ ] The hero route line draws once and stops; with reduced motion turned on it appears drawn.
- [ ] Fonts are self-hosted Manrope (no external font calls); Arabic pages use Noto Sans Arabic.
- [ ] Colours match the tokens on the design system page; gold never used for body text on white.
- [ ] The chat button shows Telegram first on `/ru/` and the Uzbekistan page, WhatsApp first elsewhere, and both open the real accounts.
- [ ] The enquiry form shows errors as in section 4; the upload offer appears only for countries switched on; Uzbekistan shows "opening soon" until counsel confirms.
- [ ] The upload page works only from an emailed link and removes the token from the address bar.
- [ ] All eight photo/video placeholders are replaced with real, released photography.
- [ ] Zero amber "Needs confirmation" markers (`node scripts/content-lint.mjs apps/web/dist --strict`).
- [ ] Largest Contentful Paint under 2.5 s on 4G; accessibility scan passes (`python tests/e2e/site_check.py`).
- [ ] No doctor profiles, prices, testimonials or success rates anywhere; no HIPAA or DPDP compliance claims.

Handed over with the repository `nuhavi-health-web` (README, docs/HANDOVER.md, docs/DEPLOYMENT.md, docs/PHOTO-BRIEF.md). Deployment needs the founders' written approval, stage by stage.
